APPENDIX I. TABULAR STATEMENTS.
II. STATISTICAL RETURNS.

REVIEW ON THE EDUCATIONAL REPORT, FOR 1876—77.

1. The work of the Educational Department had been much retarded during the year previous by an out-break of cholera, and it was feared that the distress which more or less began to prevail during the year under review would have seriously impeded the spread of education amongst the masses of the people. It is, therefore, gratifying to find that a substantial increase had arisen in the number of pupils under instruction, especially in the Vernacular schools, which have exhibited remarkable "stability and vitality," and that the masters have been able, under peculiar difficulties, to maintain the number of their pupils.

2 The principal educational measures of the year may be summarized as follows:—

(1.) The instructional staff of the Central College has been strengthened by the appointment of a Vice Principal, as authorized by the Secretary of State. Mr. Hormosji Jehangirji Bhabha, M. A., has been selected for the post, and it is hoped that the measure will be productive of increased efficiency.

(2.) In order to provide more fully for the teaching of the Natural Sciences, the services of Mr. F. E. Harman, M. R. A. C., F. C. S., Superintendent of the Government Experimental Farm, and of Mr. J. Cameron, Superintendent of the Lal Bagh, have been secured to give courses of lectures to the students attending the School of Engineering and Natural Science at Bangalore.

(3.) One new Sub-Deputy Inspector of Village schools has been appointed during the year.

(4.) Eight new Hindustani schools have been established in order to provide instruction for such members of the Siledar and Barr forces, and their children, as may wish to receive the elements of education.

3. The number of institutions in connection with the Department rose from 844 to 921, and the number of pupils from 36,309 to 38,389. The institutions are classified as under:—

	Schools.	Pupils.
Government	795	29,373
Aided	126	9,016

4. The Director of Public Instruction points out that the increase in the number of pupils would have been considerably larger but for the exceptional circumstances of the year under review.

5. The schools are classified according to the standard of instruction imparted by them as follows:—

	Government.		Aided.	
	Schools.	Pupils.	Schools.	Pupils.
College and Collegiate Schools	3	1,038	...	...
Higher Schools ...	5	590	6	1,244
Middle ,, ...	44	3,617	37	2,258
Lower ,, ...	722	22,810	47	2,544
Girls' ,, ...	11	356	34	2,823
Normal ,, ...	4	816	...	...
Special ,, ...	6	846	2	147
	795	29,373	126	9,016

6. It is noticed that out of 795 Government schools, 722 or more than 90 per cent are primary schools.

7. The pupils are divided between the different races or castes as noted below :—

	1875—76.	1876—77.
Hindus	30,631	32,747
Mahomedans	3,640	3,797
Others. Europeans	883	652
Others. Eurasians	581	619
Others. Natives	574	574
	36,309	38,389

8. The Unaided schools are reported to have been seriously affected by the famine. In the year under review the number of these schools decreased from 1,350 to 935, and the scholars, from 17,882 to 13,165.

9. *Inspection.*—The Inspectors of the two Circles of inspection (Mr. Hodson and Mr. Marsden,) had the supervision respectively of 345 schools with 12,595 pupils, and of 285 schools with 11,985 pupils; both officers would appear to have done good work, but the Chief Commissioner is apprehensive that the numerous and scattered elementary schools are not visited as frequently as is desirable, and is of opinion that the schools in the districts would gain considerably in vitality and efficiency by an increase in the number of the subordinate Inspectors of Schools, and by all the District Officers taking every opportunity of inspecting these schools and of encouraging a regular and greater attendance of the pupils.

10. The Director of Public Instruction should communicate to the District Officers the impressions derived from his inspection of such schools and endeavour to obtain their efficient co-operation.

Financial Statistics.

11. The Government expenditure on education amounted to Rs. 3,34,175 distributed as follows :—

	Rs.
Direction	15,880
Inspection	28,293
Instruction including all educational expenditure not coming under the preceding heads	2,90,002
	3,34,175

12. The percentage of Direction and Inspection was respectively 4·75 and 8·46. From the above amount must be deducted the sum of Rs. 1,09,929, the amount of receipts from school fees, the proceeds of the sale of books carried to the credit of Government, educational share of Local Fund collections and contributions from Municipal Funds. The net expenditure was thus Rs. 2,24,246.

13. The sums spent on the different grades of Government Schools are given as follows :—

	Rs.
College and Collegiate Schools	37,725
Higher Class Schools	18,730
Middle do do	29,171
Lower do do	96,838
Female Schools	3,175
Normal do	8,448
Special do	11,881

14. It appears from the foregoing statement that Rs. 96,838 or about 28·97 per cent of the whole expenditure was devoted to primary schools. The Chief Commissioner considers that every encouragement should be afforded to fostering the progress of education amongst the masses of the people.

University Examinations.

15. The fact that a native, Mr. Krishna Rao, of Mysore has, for the first time, obtained the Degree of Master of Arts, is deserving of note, and to mark his appreciation of the industry displayed by him and the success which attended his efforts, the Chief Commissioner was glad to be able to nominate him as an Attaché to the Local Administration.

16. The Chief Commissioner is of opinion that every encouragement should be extended to induce students to prosecute their studies in the higher branches of education beyond the stage at which most natives of this Province consider themselves sufficiently qualified for the public service and consequently are only too apt to discontinue their studies.

17. The results of the Matriculation, F. A. and B. A. Examinations are contrasted below with those reported for the year before:—

	1875—76.		1876—77.	
	Presented.	Passed.	Presented.	Passed.
Matriculation	131	50	171	104
F. A.	27	12	24	3
B. A.	6	2	5	2

18. One noticeable feature in connection with the Matriculation Examination is that the ratio of successful candidates to the examinees has risen at a bound from 38·16 to 60·81 per cent in the year under review. The Director explains that this was owing to the comparative lightness of the test this year. On the other hand, as regards the F. A. Examination, there was a decrease in the number of candidates who presented themselves, and a still greater diminution in the proportion of successful candidates. The failure is attributed to the application of a severer test in the English language. The Chief Commissioner concurs with the

Director of Public Instruction in considering that any such marked fluctuation in the standards of examination is much to be deprecated. The two candidates who graduated were students of Aided institutions. During the year the Aided schools continued to be more successful than Government institutions.

College and Collegiate Schools.

19. The following statement shews the attendance in the Central College, Bangalore, at the close of the years specified, and the number of students that passed the several University Examinations in those years:—

	No. of students on the rolls.	No.—that passed.		
		Matriculation.	F. A.	B. A.
1874—75	574	11	9	1
1875—76	524	7	6	2
1876—77	470	13	1	0

20. It is observed that the attendance has steadily diminished, but it seems probable that this is owing to the operation of certain exceptional causes specified in para 39 of the Report. The results obtained at the University Examinations are not satisfactory, especially when brought into comparison with the success which has attended the efforts of the aided institutions. The remarks made by Mr. Waters, the Principal of the College, as given in para 44 of the Report, are to some extent explanatory of the want of success on the part of the students.

21. The proposed location of the Central College in the Raja's residence, which is situated at some distance from the homes of the greater part of the students, has been deferred for a time as being considered likely to affect prejudicially the attendance of the College, which has already declined. When the Railway to the Pettah has been opened it may be found possible to locate the College Classes in the above building without inconvenience to the interests of the students residing in the Pettah.

22. The number of pupils on the 31st March 1877 on the roll of the Raja's High School at Mysore was 338 against 350 in 1875—76. The fees collected amounted to Rs. 2,823.

23. Five pupils were successful in the Matriculation Examination, but none in the First in Arts.

24. The attendance at the High School, Shimoga, in 1876—77, was 230 against 212 in the preceding year. The fees collected amounted to Rs. 1,506. The success attained by the institution at the Matriculation Examination, at which 9 students out of 11 passed, is creditable. Five students were sent up for the F. A. Examination but without success.

25. *Higher Class Schools.*—Of the five higher class schools in the Province, the Hassan District School holds the first place. Ten pupils passed the Matriculation Examination against 4 in the previous year. The District School at Chikmagalur has increased in numerical strength. The Kolar District School is reported to have made an advance, though still falling below the standard of a District School both in attendance and efficiency. The Chief Commissioner trusts that no exertion will be spared to secure improvement. The cost to Government per pupil in higher class schools during 1876—77 was Rs. 22—5—1 as against Rs. 25—9—11 in the year preceding.

26. *Middle Class Schools.*—There was a falling off of attendance in Anglo-Vernacular schools amounting to 14 per cent—a result attributed to an increase in the rates of fees. Viewed as a whole, the condition of these schools is not as satisfactory as it might be. Mr. Saunders trusts that efforts will be put forth to promote the efficiency of this important class of schools.

27. The proposal referred to in para 77 of the Report, in regard to the institution of self-supporting English classes in connection with Taluk Vernacular middle schools, has been already noticed in the Review of the Educational Report for 1875—76. The Chief Commissioner is of opinion that the benefit resulting from the introduction of a little English, though no doubt attractive, is very doubtful; moreover, if the recent increase in the scale of fees has produced a diminution in the *effective* demand for English education, Mr. Saunders cannot see how these institutions can be made self-supporting. As English education is mainly a luxury confined to those youths who look forward to official employment as their profession in life, there is no reason why those who are able to afford

it should not have recourse to the District and Divisional schools, where a thorough course of instruction is given.

28. The total attendance in the 39 Middle Class Taluk Vernacular schools is given at 3,434, shewing an increase of 221 pupils as compared with the previous year. The condition of these schools appears to be generally satisfactory.

29. The annual cost to Government of educating each pupil in Middle Class schools was Rs. 8—1—5.

30. *Lower Class Schools.*—The number of Lower Class Taluk schools has increased by 8, and the attendance by 13 per cent. Every opportunity should be taken of inspecting these schools and improving their standard.

31. The number of Hobli (village) schools has risen to 647 with 19,420 pupils, giving an increase of 55 in the number of schools and of 1,352 in the number of pupils.

32. The average annual cost of each " Hobli " school was nearly Rs. 115 or Rs. 10 a month, and the average number of pupils in attendance was 30.

33. Looking to the classification of pupils according to the standard of instruction given in para 98 of the Report, it is noticed that of 19,420 pupils, 14,390 are still occupied in acquiring the first rudiments of education—reading, writing, and simple arithmetic—suited to the affairs and concerns of rustic life. The Chief Commissioner hopes that a proportion of this class of schools is duly visited by the Inspectors of Circles.

34. *Female Schools.*—The Government female schools number 10 with 346 pupils. The Chief Commissioner views with pleasure the evidence furnished in para 107 of the interest taken by the more intelligent inhabitants of Chikballapur in the matter of female education. It is also very satisfactory to find that a Brahman girl has been appointed as a Pupil teacher at Sidlaghatta.

35. *Normal Schools.*—The paucity of pupils in the Hindustani Normal School at Bangalore is noticed. In para 112 the Director remarks in regard to the working of the Nundydroog Normal School.—" The

Deputy Inspector reports himself as well satisfied with their (candidates for masterships) ability and attainments. The only defect observed was as regards knowledge of the theory of teaching and of method."

36. This seems rather an important exception, seeing that the one object of a Normal School is to develop the ability and method of imparting instruction.

37. *Special Schools.*—At the commencement of the year the total number of pupils attending the School of Engineering and Natural Science was 14. At the close there were 24, 12 in the Upper Department and 12 in the Lower.

38. The examination of the Upper Department gave, upon the whole, satisfactory results, although there appeared to be some deficiency in Mathematics, and the students seemed rather unequal in their attainments. Of the numbers of this Department, five first year students are under training for the Public Works Department, and three for the Forest Department.

39. Four students of the Lower Department passed the final examination and entered the Public Works Department, and two were discharged as failing to reach the requisite standard of efficiency.

40. *Private Institutions under Government Inspection.*—Of private institutions under Government inspection and aid, there were 90 for boys, 34 for girls; of which 22 were in the Bangalore District, and 2 for special education.

41. Of Rs. 50,190 given as grants-in-aid, no less than Rs. 30,990 were bestowed on Middle and Lower schools. From paras 132 and 133 it appears that the newly sanctioned and the increased grants-in-aid have almost entirely been allowed for the support of Sanskrit and Hindustani Schools. The Bishop Cotton's School and College is reported to continue to maintain the reputation it has earned, and to occupy the foremost place among Aided institutions. Thirteen of the pupils were successful in the Matriculation Examination, 2 in the F. A., and one in the B. A. The Wesleyan Mission School, Bangalore, surpassed every institution in the Province in the results obtained at the Matriculation Examination, having passed 22 pupils. Of the other Higher Class Aided schools the

London Mission School, Bangalore, and the Wesleyan Mission School, Mysore, are in a state of efficiency. It is observed that, although there has been an increase in the number of Aided Middle schools and in the average daily attendance, as also in the grant-in-aid from Government, the fees realized have fallen off.

42. The number of Aided Lower schools rose from 41 to 47, and the average number of pupils from 2,044 to 2,267. They appear to continue to do much useful work, each in its own sphere.

43. Two thousand six hundred and twenty seven girls are under tuition in the 34 Aided Female schools, of whom upwards of 1,500 attend schools of the lowest and most elementary character, and 778 are in Middle schools.

44. The two Aided special institutions (*viz.*, the Anglo-Indian Aid Association and the Literary and Scientific Institute,) are favorably mentioned.

45. *Private Unaided Schools.*—The decrease in the number of private Unaided schools has been already adverted to. From the description given of these indigenous institutions in para 170, it appears that the great majority of them still retain their primitive character.

46. The hearty acknowledgments of the Chief Commissioner are due to Mr. Rice, the Director of Public Instruction, for the services rendered by him in supervising the working of this, one of the most important of the Public Departments, during the period under review.

By Order,

R. A. COLE,

Offg. Secretary.

6th February 1878.

OFFICE OF THE DIRECTOR OF PUBLIC INSTRUCTION,
DATED BANGALORE, *20th August* 1877.

From

LEWIS RICE, Esq.,
Director of Public Instruction in Mysore.

To

MAJOR TREDWAY CLARKE,
Secretary to the Chief Commissioner of Mysore.

SIR,

I have the honor to report on the progress of Public Instruction in Mysore for the year ending 31st March 1877.

2. Last year's Report referred to the outbreak of cholera as having seriously impeded the work of the Educational Department throughout the Province, notwithstanding which, however, a large increase took place in the number of pupils under instruction. It was then little in anticipation that a period was approaching so disastrous as the country has since passed through. Drought, dearth and famine have depopulated the villages and impoverished the ryots, while cholera and small-pox have decimated the famishing people in every direction. At one time it became painful to open the daily budget of letters received by the post, so numerous were the reports of one and another struck down by the hand of death. These circumstances had prepared me to find a large diminution in the number of pupils attending school.

3. But I am glad to report that this expectation has been disappointed, and that, spite of the exceptionally adverse times that have befallen the country, a substantial increase can be shewn in the number of pupils under instruction. Especially is this the case among the vernacular schools. The Inspector of the First Circle remarks that he was unprepared for the "stability and vitality which the village schools have exhibited," and that "the manner in which most of the masters have

stuck to their work throughout this trying year is highly commendable." The Inspector of the Second Circle also observes that "the highest praise must in the majority of cases be awarded to the masters, who have succeeded in the midst of peculiar difficulties in keeping their boys together at all."

4. The principal measures carried out during the year may be briefly summarized as follows:—The staff of the Central College has been strengthened by the appointment of a Vice Principal, and arrangements made for scientific lectures in the School of Engineering and Natural Science. The removal of these two institutions to separate premises known as the Raja's Castle, and the formation of a distinct High School in the present building, have also been under consideration. The school hours in the Mysore and Shimoga High Schools have been changed, with, it is believed, a beneficial effect. Periodical comparative examinations have been instituted for the higher class schools, which do good in promoting a healthy rivalry.

5. An additional inspection circle has been formed for the Hobli schools, with the view of confining each Sub-Deputy Inspector's charge to about 50 schools, and also to make the limits of these subordinate ranges coincide with those of the principal inspection circles, as otherwise some men are placed under a divided authority, which is found not to work well. Under the arrangements entered into with the Military Assistant, as referred to in last year's Report, several Hindustani schools have been established for the benefit of the Silédar and Barr forces, in buildings contiguous to their lines, at the several stations occupied by regiments or detachments.

6. All the schools have been provided with a Visitors' Book, in which visitors inscribe their remarks on the state in which the school was found. This proves a very convenient record for reference, and is valued by the masters. As a rule, copies of the remarks are forwarded by them to the Director's office for information, and the fact that observations occasionally the most adverse to the school and the master are faithfully transmitted, however unsatisfactory such a state of things may be, has struck me not only as a gratifying evidence of honesty of character but as a proof of confidence on their part that a fair hearing will be allowed before condemning them.

7. Those hobli schoolmasters who appeared to stand in need of further training have been remanded to the Divisional Normal Schools for a longer course of instruction, and a select number of pupil teachers have also been admitted to undergo preparation for the master's office. As these are generally youths educated in our schools, and have already gained experience in teaching, it is expected that they will furnish a superior class of schoolmasters to fill up the vacancies which are continually occurring. Such are a few of the operations of the year, but the detailed report which follows can alone supply full information as to what has been done. It may be added here, however, that the indications of a feeling in favor of female education are becoming clearer and more general.

8. At the close of the year there were in connection with the Department 921 schools, containing 38,389 pupils, against 844 last year with 36,309. The addition during the year therefore consists of 77 schools and 2,080 pupils. The increase of 5¾ per cent in attendance is, under the unfavorable circumstances previously described, a much better result than might have been expected.

9. The following statement compares the figures for the two years in their relation to Government and Aided schools respectively. The increase is thus shewn to have been at the rate of 6 per cent in the former and 4·8 per cent in the latter :—

Year.	Government.		Aided.	
	Schools.	Pupils.	Schools.	Pupils.
1876—7 ...	795	29,373	126	9,016
1875—6 ...	730	27,711	114	8,598
Increase.....	65	1,662	12	418

Of the new Government schools, 8 were Hindustani, chiefly established for the benefit of the Mysore Local Force, 1 Telugu, 2 Canarese girls' schools, and the rest Hobli or Village schools. The new schools receiving grants-in-aid included 7 Sanskrit, 5 Hindustani and 2 Canarese, one for boys and one for girls. Aid was withdrawn from two others.

10. The Unaided schools of the Province have been returned at 935, with 13,165 pupils. Compared with the 1,350 schools and 17,882 pupils of last year, there has been a diminution to the extent of 415 schools and 4,717 pupils. The effects of the famine are here clear enough. But though so many indigenous school masters have had to throw up their employment, about half their pupils would appear to have been transferred to the Government schools.

11. Adding together all classes of schools in Mysore, we obtain a grand total of 1,856, which are giving instruction to 47,759 boys and 3,795 girls, or 51,554 children altogether, which is at the rate of 1 in 98 of the population.

12. The pupils of Government and Aided schools consist of 34,623 boys and 3,766 girls. According to creed, 32,747 are Hindus, 3,797 Muhammadans, and 1,845 others, which includes 652 Europeans, 619 Eurasians, and 574 Natives.

13. The following list shews the number of schools connected with Government that fall under each grade, and their strength as regards pupils :—

Class of Schools.	Government.		Aided.	
	Schools.	Pupils.	Schools.	Pupils.
College and Collegiate Schools	3	1,038	...	...
Boys' Schools.				
Higher	5	590	6	1,244
Middle	44	3,617	37	2,258
Lower	722	22,810	47	2,544
Girls' Schools.				
Higher	...	...	3	344
Middle	...	...	10	808
Lower	11	356	21	1,671
Normal Schools ...	4	116	...	...
Special „ ...	6	846	2	147
Total.....	795	29,373	126	9,016

II. CONTROLLING AGENCIES.

14. *Inspectors.*—The First and Second Circles of inspection remained throughout the year in charge respectively of Mr. Hodson and Mr. Marsden. The former claims the supervision of 345 schools with 12,595 pupils: the latter of 285 schools with 11,959 pupils. Both officers have done good work, notwithstanding the unusual obstacles which existed in the way of travelling about the Province, owing to the prevalence of sickness and famine. Had the year been more favorable, the exertions of the Inspectors to advance educational interests in their respective circles could not have failed to add considerably to the numbers under instruction. While acknowledging the efficient services rendered in both divisions, it gives me pleasure to point out particularly the great improvement that has taken place in the Second Circle since Mr. Marsden's appointment to it, and the location of the head-quarters at Shimoga.

15. *Deputy Inspector.*—Mr. Venkatpati Aiyangar has acted as Deputy Inspector in charge of the Head-Quarter Circle throughout the year. His report shews 263 schools with 9,829 pupils to be under his inspection. His activity is entitled to commendation, and I hope to see him gain in judgment as he gains in experience. The other place of this grade is in abeyance for the present.

16. *Sub-Deputy Inspectors.*—Of this useful class of officers there are 15 for the inspection of Hobli schools, of whom 3 are in charge of the Divisional Normal Schools as training masters. Besides the above, there are 2 Muhammadan Sub-Deputy Inspectors for the inspection of Hindustani schools. Each Hobli School Sub-Deputy Inspector has charge of a circle, of which 12 have been formed. Of the Hindustani Sub-Deputy Inspectors, one is attached to the Head-Quarter and First Circles, the other to the Second Circle. One addition was made to either class during the year.

17. The following was the staff and distribution of the Sub-Deputy Inspectors at the close of the year:—

Name.	District or Charge.	Station.
	Hobli School Sub-Deputy Inspectors.	
Srinivas Aiyangar ...	Bangalore East ...	Bangalore.
Venkat Ramanaiya ...	Bangalore West ...	Magadi.
Ramacharlu ...	Kolar South ..	Hoskote.
Rangaswami Iyer ...	Kolar North ...	Sidlagatta.
Dakshina Murti Shastri..	Mysore West ...	Mysore.
Múrti Rao ...	Mysore East ...	Seringapatam.
Srinivas Tatachari ...	Túmkúr-Hassan Junction ...	Kadaba.
Raghavendra Rao ...	Túmkúr-Chitaldroog „ ...	Sira.
Venkat Rao ...	Hassan West... ...	Hassan.
Puttappa ...	Shimoga West ...	Ságar.
Timmappa ...	Kadur District .	Kadur.
Tirumalachari ...	Chitaldroog West ...	Chitaldroog.
	Training Masters.	
Aplachari ...	Nundydroog Normal School.	Devanhalli.
Seshaiyangar	Ashtagram „ ...	Hole Narsipur.
Venkat Narnaiya ...	Nagar „ ...	Shimoga.
	Hindustani Sub-Deputy Inspectors.	
Khwaja Muhammad ...	H. Q. and First Circle ...	Bangalore.
Sayad Mustafa ...	Second Circle ...	Shimoga.

18. The following were the changes made among the Hobli School Sub-Deputy Inspectors. An additional circle was formed in the east of Bangalore District, and other slight re-arrangements made, for the purpose of restricting each Sub-Deputy Inspector's charge to about 50 schools, and also to make the limits of these sub-divisions coincide with those of the great inspection circles at their points of junction, in order that no Sub-Deputy Inspector might be under a divided authority. To the new circle, Venkat Ramanaiya was transferred from Kadur. His place was taken by Timmappa from Kolar North, to which Rangaswami Iyer, an Assistant Master of the Bangalore High School, was appointed. Shamachari of the Kadaba circle was pensioned, Srinivas Tatachari from Shimoga being selected to succeed him, the place of the latter being taken by Puttappa, a native of the Malnad, and for many years highly success-

ful as Taluk Master at Ságar. In Hassan District it became necessary to remove Lakshmanaiyangar, and his place was taken by Venkat Rao, Training Master of the Ashtagram Normal School. Seshaiyangar, Taluk Master of Closepet, was put in charge of this institution.

19. The following Sub-Deputy Inspectors are specially commended for their work, and the progress of the schools under their charge : Tirumalachari, Múrti Rao, and Ramacharlu. Praise is also due to Dakshina Murti Shastri and Srinivasaiyangar. Srinivas Tatachari had worked well in the Shimoga District, and has effected improvements in the Túmkúr District since his transfer. Timmappa and Venkatramanaiya have been the subjects of many complaints. Raghavendra Rao also is far from satisfactory.

20. Shamachari, who retired on pension on reaching the age of 55, was an experienced man, who commanded much respect, but he had latterly become too feeble to travel about sufficiently. He was formerly a Sub-Deputy Inspector in Raichor District, and on its transfer to the Nizam's Dominions, entered the Mysore Educational Department, being made taluk master at Sidlagatta. On the introduction of the Hobli school scheme, he was one of the first selections for the appointment of Sub-Deputy Inspector, an office which he filled with dignity. I trust that he will be comfortable in his retirement.

21. The Hassan District, I regret to say, has been thrown back by the neglect of the Sub-Deputy Inspector Lakshmanaiyangar, who has now been removed. He had previously rendered good service and been specially commended, but some deaths in his family, as far as can be made out, have quite unnerved him and apparently rendered him incapable of doing inspection work.

22. Of the Hindustani Sub-Deputy Inspectors, Khwaja Muhammad has continued to give satisfaction by his careful performance of the duties entrusted to him. Sayad Mustafa has been newly appointed. He is a man of considerable experience and attainments, and has thus far worked well.

III. GENERAL FINANCIAL STATISTICS.

23. *Charges.*—The Government expenditure for the year is exhibited

in the following statement, under the prescribed heads, and distinguishing the amount met from State and Local funds respectively :—

Head of Charge.	From State Funds.	From Local Funds.
Direction with its subsidiary charges ...	15,880	...
Inspection with its subsidiary charges ...	21,380	6,913
Instruction (including all educational expenditure not coming under the above heads). ...	1,95,852	94,150
Total Rs....	2,33,112	1,01,063

24. By adding the expenditure from other sources, which amounted to Rs. 87,586 in Aided schools, and to Rs. 31,592 in Unaided schools, a grand total is obtained of Rs. 4,53,353 expended on education during the year from both public and private funds.

25. *Receipts.*—The receipts from all sources on behalf of Government schools amounted to Rs. 1,09,929, being composed of school fees Rs. 19,743, proceeds of book sales Rs. 16,696, educational share of local fund collections Rs. 70,503, and contributions from municipal funds Rs. 2,987. The effects of the famine have been largely to reduce the receipts under every head but fees, which shew an increase of Rs. 1,240; this would have been much more in a good year. Under the local fund collections there is a fall of no less than Rs. 23,523 from the amount allotted last year.

26. The receipts in Aided schools are returned at Rs. 84,480, of which Rs. 32,271 is set down as derived from fees. But it is in the income of Unaided schools that the results of the year's distress may be expected to be most manifest, and accordingly we find only Rs. 28,329 realized against Rs. 38,293, a decrease of Rs. 9,964. The fees in this class of schools yielded only Rs. 28,149 against Rs. 38,113 last year.

27. Adding together all the items under the head of receipts, we obtain a grand total of Rs. 2,22,738 as the educational income of the Province from every description of school, Government and private. Of this sum, Rs. 80,163, or over 35 per cent, represents the fees paid by the pupils.

28. An analysis of the expenditure on instruction in the various grades of Government and Aided schools exhibits the following results:—

Description of Schools.	Government.		Aided.	
	From State Funds.	From Local Funds.	From State Funds.	From Other Sources.
College and Collegiate Schools	37,725	...	...	...
Boys' Schools—				
Higher	16,225	2,505	12,160	29,653
Middle	29,171	...	13,480	20,585
Lower	22,223	74,797	8,124	11,467
Girls' Schools—				
Higher	...	...	4,040	10,097
Middle	...	...	3,390	3,457
Lower	3,176	...	5,996	9,731
Normal Schools ...	1,953	6,495	...	...
Special „ ...	11,881	...	3,000	2,596
Total Rs...	1,22,354	83,797	50,190	87,586

Grants-in-aid bore to the whole Government expenditure on instruction the ratio of 15 per cent.

IV. UNIVERSITY EXAMINATIONS.

29. *Degrees.*—The highest University distinction yet gained by a Native of Mysore * was obtained at the last examination of the Madras University by N. Krishna Rao, who then took the degree of Master of Arts, third class. He received his early education in the Wesleyan Mission School at Mysore, from which institution he matriculated. He next entered the Raja's High School at Mysore, and from there passed successively the First in Arts and the Bachelor of Arts examinations. Meanwhile he had been appointed as an Assistant Master in the institution, which position he held when he became Master of Arts. In recognition of his talents, and as being a well connected young man, the Chief Commissioner has been pleased to appoint him an Attaché to the Mysore Commission, than which it is believed no reward could have been more gratifying to the recipient, or better calculated as an example to stimulate the exertions of the youth of Mysore now under instruction.

* Unless Masters of Laws be taken into account. The Madras University has had only three Masters of Laws, of whom two are Mysoreans, passed in 1870 and 1871; and out of 14 Masters of Arts one is a Mysorean.

30. Two candidates from Mysore succeeded in obtaining the degree of Bachelor of Arts in the second class, one Mr. T. A. Pope, a student of Bishop Cotton's School and College, who passed 46th; the other, David Isaac, a Native Christian master in the London Mission Institution, who passed 58th. There were three candidates besides who failed, namely, two from the Central College and one private student. With regard to those from the Central College, their failure is attributed to the fact of their being in public employ, which prevented their giving sufficient time to preparation. One advantage anticipated from a change of school hours, now under consideration, if it should be carried out, is that young men in the college department will not be able to take employment in an office and attempt to carry on their studies at the same time, but will be under the necessity of making a choice one way or the other.

31. M. B. Srinivasaiyangar, a former student of the Raja's High School, Mysore, also took his degree from the Presidency College, being placed 23rd in the second class. He has since entered the Mysore Educational Department.

32. Srinivas Rao, the second candidate from Mysore who gained the degree of B. A. last year, and who was mentioned in the previous report as having taken Sanskrit for his optional language, became entitled to the minor reward of Rs. 250 offered by the Maha Raja of Vizianagaram for proficiency in that language, and it was received for him through the Director of Public Instruction, Madras. This will encourage him to persevere in studying for the M. A. degree and endeavouring to attain a higher standard in Sanskrit.

33. *Branch Examinations.*—In addition to Bangalore, Mysore was this year appointed a station for the holding of the First Arts and Matriculation examinations in this Province.

34. *First Arts Examination.*—Only three candidates out of 24 were successful this year, a smaller number than for several years past, the average for the last four years being 10 to 15. The same result however was experienced throughout the Presidency, and was due to the application of a higher and severer test in English. This, if maintained in future, will doubtless do good, but fluctuation in the standards of examination is to be deprecated.

35. The following were the institutions from which candidates passed :—

Institutions.	Passed Candidates.		
	First Class.	Second Class.	Total.
Government.—			
Central College	...	1	1
Aided.—			
Bishop Cotton's	1	1	2
Total.....	1	2	3

36. *Matriculation.*—In contrast to the above, the Matriculation examination was somewhat easier than usual, the result being that 104 candidates from Mysore were successful, out of 171 who went up; whereas the average for five years past has been 48 to 50. There were 52 candidates from Government schools, 88 from Aided schools, and 31 private students. Of those who matriculated, 81 were Hindus, 2 Native Christians, and 21 Europeans or Eurasians.

37. The following is a tabulated statement of the schools from which the passed candidates proceeded :—

Schools.	Passed Candidates.		
	First Class.	Second Class.	Total.

Total... ...	795	28,560	23,417	122,354	83,797	19,743	16,696

A. College and Collegiate Schools.

Central College, Bangalore.

39. At the close of the year there were 470 students on the rolls of the Central College. The average monthly roll was higher, being 497. The average daily attendance was 432. The students include 449 Hindus, 3 Muhammadans, 4 other natives and 14 Europeans or Eurasians. The amount obtained by fees was Rs. 5,193. The last report referred to some of the causes which had tended to diminish the attendance at this institution of late, namely, an incomplete staff, unavoidable changes among the masters, and the interference of building operations connected with extension of the premises. These inconveniences have now come to an end and the Principal reports the classes to be in a more settled state and doing good work. The statistics of the ensuing year will therefore, it is hoped, shew that lost ground has been more than fully recovered.

40. The office of Vice Principal was, on the suggestion of the Secretary of State for India, filled up by the appointment of a Native

gentleman. After due inquiry, Mr. Hormasji Jehangirji Bhabha, M. A., acting as Assistant Professor in Elphinstone College, Bombay, was selected, and entered upon his duties in November. Mr. Bhabha is a Parsee gentleman, who went to England to prepare for the Indian Civil Service examination, and passed but little below the selected number. On his return, he obtained temporary employment as Assistant Professor of Latin. He was well recommended by the Director of Public Instruction, Bombay, and since his appointment to Mysore has been made a Fellow of the Bombay University.

41. The staff of assistant masters is now a strong one, composed of four graduates, one European and three Natives, of seven other masters, four of whom have passed the First Arts examination, and of two munshis, one for Canarese and one for Tamil. One junior master and one munshi were added during the past year.

42 The *College Department* numbers 100 students, of whom one is in the senior B. A. class, 5 are in the junior B. A., 18 in senior F. A., 73 in junior F. A., and 39 in the Matriculation class. The Principal reports that " the B. A. classes, composed of irregular students, four of whom are employed and can only attend at certain hours, are rather unsatisfactory. They are a great drain on the teachers. The numbers are small, partly because several who passed the F. A. the last year or two have joined the Engineering College. One other employed student is assisted in his work out of school hours. The junior F. A. is larger and more attentive than the senior F. A. class and promises to do well."

43. "In addition to papers occasionally given, the classes are examined at the end of each term and scholarships awarded according to results. At the end of the term a set of papers is prepared for the Matriculation classes in the Native schools here and the Government school at Shimoga, by the Principals and Assistants. This is believed to produce a healthy rivalry amongst the boys."

44. Of the results of the University examinations, Mr. Waters' report is as follows :—" Two employed students were unsuccessful in the degree examination. Very little time could be given to them, and being employed was a great drawback. Eleven appeared for and one passed the F. A. examination. The English branch of the examination was

difficult, but still the class ought to have done better. I attribute the failure to the inefficient and insufficient staff during the greater part of the last two years, and in a great measure to the conduct of the students themselves. A feeling of dissatisfaction prevailed, and produced an unhealthy tone in the class ; a want of confidence in, and respect for, teachers, self conceit and laziness. The students became discontented, and expected to pass the examination with little effort on their part, and when they failed were disposed to cast all the blame on their teachers. This spirit shewed itself more fully this year, as I was able to judge from letters I received. I spoke to them on the subject and they have lately shewn a much better spirit with reference to their work. For the Matriculation examination 17 were sent up, of whom 13 passed, 3 failed and 1 died during the examination. Two who appeared privately also passed."

45. Physiology having been introduced into the University course as a subject of study, a proposal to obtain some anatomical casts has been submitted for sanction. Meanwhile Mr. Bhabha has made a few dissections for the students, but some are reported to have " left before the lecture was over, saying that they could not endure the sight of blood !"

46. The *School Department* contains 370 pupils, and the classes are as large as can well be taught by the masters in charge. More attention has been paid to exercises in composition and reciprocal translation. The school classes are often inspected and examined thoroughly at the end of each term by the senior masters. The annual examination was conducted mostly by the masters of the college, and the results were in most cases fair.

47. Great difficulty it is said is experienced in collecting fees, especially in the college department, and nearly all who join from other schools ask for a scholarship or a free, or partially free, education, and if refused they stay away from the class. Another method of avoiding payment was for the students to absent themselves after their applications for the University examinations had been accepted. To prevent this, the Heads of the three Native Institutions have come to an agreement to divide the year into three terms of 4 months each, beginning with

the 1st of February, and collect the fees in advance for each term. This plan is reported to have been very successful.

48. The Library books have been freely used by masters and students. The Reading Room has been pretty successful, and there are now 70 subscribers. A debating club, which meets once a fortnight on Saturday evenings, has lately been opened, Mr. Bhabha presiding at most of the debates.

49. The *United Schools Athletic Sports* came off at the usual time, in the presence of a large concourse of spectators, and the prizes were distributed to the successful competitors by the Chief Commissioner.

Rajah's High School, Mysore.

50. Since the 1st of June, this school has been in charge of Mr. C. H. Candy, B. A., LL. M., previously acting as Vice Principal of the Elphinstone High School, Bombay. The number of pupils at the close of the year was 338, with an average daily attendance of 295, the corresponding numbers for last year being 350 and 271. The total strength of the school has thus been maintained at nearly the same figure, while the daily attendance has risen. The pupils include 324 Hindus, 10 Muhammadans, and 4 Europeans or Eurasians. The fees yielded Rs. 2,823 against Rs. 2,553 last year.

51. The four students who appeared for the F. A. examination were not successful, for the same reason that led to similar failures this year in all parts of the Madras Presidency. Five students matriculated out of 12 who went up. The senior classes were examined near the end of the year by means of papers set by various gentlemen. The vernacular branches, on their transfer to separate premises, have largely increased their numbers, as will be related further on.

52. An important change was made in altering the school hours, the Wesleyan Mission School having by mutual agreement simultaneously adopted the same hours. The pupils now attend from 11 to 2 and from 3 to 5, instead of from 7 to 11, which was the former practice. Saturday is a half holiday, but a whole holiday is now given on the last Saturday of the month. The Head Master reports that "the change, after a trial of two months, has worked very well. No boys have left on account of it, and I think the work is more lively and better in every way."

53. "Games have been kept up with great spirit by the boys. We had several good cricket matches with the Royal School, and with the help of several gentlemen of the station we got up the United School Athletic Sports, which were a great success, and will I hope become an annual event."

54. Of old pupils of this school, the success has already been recorded of N. Krishna Rao, who obtained the M. A. degree, and of Srinivasaiyangar, who obtained the B. A. degree. Assistant Master Ramaswami would probably have taken his degree also, but that he was induced to go to Delhi to witness the Imperial Proclamation, and could not therefore appear for the examination.

55. Since the close of the year, His Highness the Maha Raja has honored the Mysore schools by presiding at the distribution of prizes.

High School, Shimoga.

56. This school has been under Mr. Leonard, B. A., during the whole year. The number of pupils on the rolls is 230, with an average daily attendance of 190. The total for last year was 212. Great laxity seems to have prevailed formerly in enforcing regular attendance. "I found" says the Head Master, "that the boys thought any excuse for absenting themselves sufficient, and in most cases their staying away seemed to be unknown, or a matter of indifference to the parents." This state of things has now been remedied. The pupils include 199 Hindus, 2 Muhammadans, 23 other natives and 6 Eurasians. The fees yielded Rs. 1,506 or Rs. 148 more than last year.

57. Five students appeared for the First Arts examination, but, as in the case of many other schools in the Presidency, without success. In the Matriculation examination 9 passed out of 11 who went up. At the inspection, the results of the examination were on the whole good in every class, but the first and third. Of all the pupils examined 50 per cent passed.

58. To this school belongs the credit of being the first to adopt a change of hours, which was made in September, with the approval of the majority of the native community. It has not affected the attendance, and the Head Master says, "after a fair trial of seven months, I may safely assert that the change works well and has been for the best."

59. With regard to athletic exercises in general, a little steady encouragement has been sufficient to induce the boys to take kindly to them. We have cricket twice a week, swimming in the river every Saturday, leaping, running, putting the shot, throwing the cricket ball, wrestling, &c., whenever opportunity offers. More than forty boys have either learned to swim or have improved upon their clumsy native style. I make it a point to accompany the swimming class, both to keep them within bounds as well as to guard against accidents."

60. The accommodation has been largely increased by the additions recently made to the premises.

B. Schools of the Higher Class.

61. *District Schools.*—The five schools falling under this head contain together 590 pupils against 601 last year, or an individual average of 118. The statement of attendance at each, as given in the margin, shews that Hassan stands first, with 168, Kolar last, with but 66. This is the only school in which the attendance is seriously below the average. It has however risen slightly during the past year, and that of Chikmagalur considerably. There is a slight diminution in the strength of each of the others. The total of fees realized in the five schools was Rs. 4,217 against Rs. 3,912 last year.

Hassan	... 168
Túmkúr	... 116
Chitaldroog	... 101
Kolar	... 66
Chikmagalur	... 139

62. *Hassan.*—Mr. G. W. Haldwell, to whom this school is indebted for the large measure of popularity it has enjoyed for many years, returned in May to the charge of it, from his temporary employment at Mysore. But it is with much regret that I have to record his sudden death not long after, on the 19th of June, from inflammation of the lungs, the result of a cold caught while attending the funeral of a friend.

63. Mr. Haldwell, previous to entering the Mysore Educational Department, was an Assistant Master in the Presidency College at Madras. He was appointed to the Head Mastership of the Hassan School in November 1862. It was then in a wretched condition, with an attendance of only 25 pupils, though it had been ten years in operation. Its abolition had, I believe, been even proposed, on the ground that Hassan presented no field for an English school. This state of things was soon changed. Under the new Head Master's active control, the school was in a few years raised to the 3rd place among the Government Anglo-vernacular schools of Mysore, and from 1867 has regularly passed candidates for matriculation. Mr. Haldwell was always regarded as one of our most effective and trustworthy masters. As a grateful tribute to his memory the Assistants and pupils of the school obtained permission to erect a tablet in the schoolroom, with an appropriate inscription.

64. Mr. J. Arbuthnott, B. A., was selected to succeed to the Head Mastership, and took charge in September. The attendance had fallen during the interval, but at the close of the year stood at 168, with an average daily attendance of 140. Out of 5 sent up for matriculation 3 passed. The school was inspected in January, and it is reported that, though the upper classes had received a temporary check during the period when there was no Head Master, they were recovering themselves, and the junior classes had not been injuriously affected.

65. *Tumkúr.*—Mr. Clapham continued in charge. The year closed with 116 pupils, and the high daily attendance of 109, against 138 and 120, the figures for last year. The fees yielded Rs. 1,286 against Rs. 1,219. Out of 7 candidates for matriculation 4 were successful. The results of the Inspector's examination were satisfactory in all classes but the one taught by the First Assistant, whose qualifications and energy alike are much below what are requisite for the position he holds, and a change seems called for with regard to him.

66. *Chitaldroog.*—Mr. Coleman, the Head Master, was compelled by ill health to take leave during February and March. At the close of the year there were 101 pupils, and the average daily attendance was 73. This District has been seriously affected by the famine, and the fees, which up to September amounted to Rs. 80 a month, have since fallen to less than Rs. 30. The total for the year is thus Rs. 665 against Rs. 816 last year. At the University examinations 6 appeared from this school for matriculation and 2 passed. The school passed a good examination at the time of inspection.

67. *Kolar.*—This school is reported to shew a slight improvement in its condition. The attendance is 66 against 60 last year. The fees produced Rs. 380 against Rs. 302. One pupil appeared for matriculation, but without success. The school is reported by the Deputy Inspector to have done fairly well in his examination, but there is much to be done before it makes good the position of a District School.

68. *Chikmagalur.*—This school, under the charge of Mr. D. Subbaiya, B. A., has continued to make satisfactory progress, notwithstanding serious interruption at one time from the outbreak of cholera. The year closed with 139 pupils against 105 last year, but the average daily attendance was only 72. Fees yielded Rs. 600 against Rs. 546, and the Head Master reports great difficulty in collecting fees, especially in the senior classes.

69. At matriculation one student of this school passed, but 8 others sent up failed. The Inspector remarks that 6 of them were not qualified and should not have been permitted to appear, but the Head Master had to yield to the importunity of themselves and their parents. The results of the annual examination of the school are reported to have been favorable, considering the difficulties the school had to contend with until the teaching staff was duly strengthened.

70. The Head Master has devoted some time and attention to the encouragement of athletic games. The senior boys regularly play cricket, and nearly the whole school may be seen, after the work of the classes is over, engaged in running, leaping and jumping, under the superintendence of their masters. At the school games, on the occasion of the Darbar held on New Year's Day, prizes were given by several Native gentlemen, and one boy is said to have taken a high jump at 4 feet 10 inches.

C. Schools of the Middle Class.

1. *Anglo-Vernacular Schools.*

71. All but one of these schools, that at Narsipur, shew a diminution of numbers on the roll, due, no doubt, in some measure to the levy of higher fees. The total strength of the five is 183, against 213 last year, but the average daily attendance was 177 against 167. While the fees yielded Rs. 695 in place of Rs. 571.

Chikballapur	...	72
Channapatna	..	44
Húnsúr	...	21
Hole Narsipur	...	25
Gundlupet	...	21

72. *Chikballapur.*—The numbers have fallen off somewhat. The amount of work done in the highest class was found to be unsatisfactory, but on the other hand there was a decided improvement in its quality. The school is a good one up to the second standard, but its aim to carry boys forward to a higher point would, under present circumstances, be injudicious.

73. *Channapatna.*—The school keeps up its attendance and standard of instruction. Most of the boys come from the neighbouring agrahara of Molur. The appointment of an additional assistant led to a marked improvement in the lower classes, and was most perceptible in the preparation of the language lessons, both English and Kanarese.

74. *Húnsúr.*—Commodious new premises were occupied during the

year, but for want of a duly qualified Head Master, the state of the school is far from satisfactory, and the number of pupils has considerably diminished. New arrangements will be made shortly for the instruction of this important school.

75. *Hole Narsipur.*—On the introduction of the higher scale of fees last year, the attendance fell to eleven boys. But gradually the deserters returned, and it is gratifying to see that the master has infused a good deal of spirit into this little school.

76. *Gundlupet.*—Makes very fair progress, but is weak in numbers. A new school house is under construction by the Public Works Department.

77. On the question of extending the instruction of English among the classes of the population who take advantage of our Taluk schools, some remarks were made in my report for last year, paras 61 and 62. Frequent applications continue to be received with reference to the subject from various parts of the country. The Inspector, 1st Circle, expresses his opinion on the question as follows:—"The work of elementary tuition in English might be extended by the appointment to the most advanced Taluk Kanarese schools of a master capable of conducting an English branch. A higher rate of fee would go towards meeting the expense, and the feeders to District and High Schools so formed would be found less expensive than the present Taluk Anglo-vernacular schools. If only the most advanced of the boys from the Vernacular schools were admitted to the English classes, the former would be stimulated."

2. *Taluk Vernacular Schools.*

78. There are reckoned under this head 39 schools, of which 35 are Kanarese and 4 Hindustani, namely, 3 in Kolar and 1 in Mysore. The aggregate attendance is 3,434 against 3,213 last year, being an increase of 221 pupils. It is interesting to note that the total includes 55 girls, of whom 25 are in the Yedehalli school, Kadur District, and 9 in the Pavagada school, Chitaldroog District. The fees in the above schools amounted to

District.	Schools.	Pupils.	Average.
Bangalore ...	7	601	86
Kolar ...	4	256	64
Túmkúr ...	5	408	82
Mysore ...	7	849	121
Hassan ...	3	248	83
Shimoga ...	7	560	80
Kadur ...	2	218	109
Chitaldroog ...	4	294	74
Total.....	39	3,434	88

Rs. 2,110 against Rs. 2,002 last year. It has been proposed to levy a higher rate in the upper classes, but the present time is not favorable for the introduction of such a change, and we shall do well if even the existing rates are collected during the ensuing year.

79. *Bangalore District.*—Nelamangala and Dodballapur continue the largest schools, having an attendance respectively of 151 and 147. Closepet follows next with 105. All three are in a very satisfactory condition and reflect much credit on their masters. Kankanhalli is also entitled to praise, but has been reduced by the sickness in the town. Magadi has also suffered severely from the same cause. The Inspector remarks that if all the lessons in this school were as well prepared as those in language, it would take a very high place. Yelahanka has not kept up its old position, and the removal of the master became necessary. Sarjapur, since the removal of the taluk head-quarters to Anekal, has lost ground considerably. Closepet and Kankanhalli schools have been provided with commodious new premises during the year. The movement in favor of a Government Kanarese school in the Bangalore Pettah, referred to in last year's report, continues, and is now headed by Rai-Bahadur Yale Mallappa Chetti. An influential meeting was convened lately on the subject, and the desire for the establishment of such a school seems to be sincere. Should the High School premises be vacated soon by the Central College and Engineering School, accommodation would become available for meeting the wishes of the movers in this matter.

80. *Kolar District.*—The Kanarese school at Sidlagatta is doing very well, and has an attendance of 104. New premises have been occupied during the year. The Hindustani schools at Kolar and Chikballapur are also well reported on, but the distress has been great among the Muhammadans on account of the famine, and has affected the attendance. The Shrinivaspur school has been placed under a new master at the close of the year, a measure which has resulted in great improvement already.

81. *Túmkúr District.*—Sira and Chiknayakanhalli appear to have made most advance during the past year. Koratagiri, while maintaining its former high standard, has fallen off much in attendance owing to famine and sickness. Túmkúr has also suffered in the same way. Mad-

giri, in addition to these adverse influences, was latterly neglected by the Head Master who has been replaced by another man. New premises are under erection for the Koratagiri school.

82. *Mysore District.*—The transfer of the vernacular branches of the Raja's High School, Mysore, to separate premises, has led to a great accession of numbers. The Kanarese school has now 251 pupils, and the Hindustani school 185, against 201 and 56 respectively last year. These are our largest vernacular schools. Chamrajnagar and Nanjangúd have also added considerably to their numbers. Every one of these middle class schools in this District is deserving of commendation, and the Head Masters of Mysore, Chamrajnagar, Malvalli, Seringapatam and Yedatore are entitled to special thanks. New premises are much wanted at Seringapatam and Malvalli. No better are procurable even for rent at the former place, and the Inspector remarks that the masters and boys are now condemned to a confinement more trying than that of any gaol. When suitable premises are available the numbers may be expected to increase. The Mysore Hindustani school has been removed to the neighbourhood of the Siledar and Body-Guard lines, and has received valuable assistance from the interest shewn in its progress by the Amildar, Davud Khan. The Head Master is a clever man and will, I trust, put forth as much endeavour to advance the reputation of the school as he does to maintain his claims to be considered a champion chess player.

83. *Hassan District.*—The Belur school has increased in strength, and the occupation of additional premises became necessary. The Hole-Narsipur school continues in a very pleasing state of efficiency. The masters of these two schools deserve notice. The Hassan school has not been so satisfactory.

84. *Shimoga District.*—The Shikarpur and Channagiri schools have improved, and the latter has now been provided with commodious premises. The remaining schools continue at about the same strength as last year. Shimoga and Nyamati are doing well as usual. Hole-Honnur is fair. Ságar and Nagar have fallen off, and neither is in a satisfactory condition. Several changes among masters have since been effected with a view of removing the hindrances to the progress of these schools.

85. *Kadur District.*—Both the Tarikere and the Yedehalli schools are well attended, having respectively 103 and 96 pupils. The results of the inspection were very favorable in both cases, and the masters deserve every credit for their successful exertions. At Yedehalli, as many as 25 girls have joined for instruction, and a separate branch for girls will be formed if the prospects continue favorable.

86. *Chitaldroog District.*—The Davangere and Hosdurga schools shew improvement, especially the former, which it is hoped will, under the new master, make up the attendance which should be obtained from so large and important a town. The Haribar school has fallen off, owing it is said to famine and sickness. The removal of the taluk head-quarters has no doubt also affected it. The Pavagada school has about the same attendance as last year, but the results of the examination were not satisfactory.

D. Schools of the Lower Class.

1. *Taluk Schools.*

87. The total number of schools is 75, with an attendance of 3,390

District.	Schools.			Pupils.	Average.
	Kanarese.	Telugu.	Hindustani.		
Bangalore ...	4	1	7	504	42
Kolar	10	6	3	715	38
Túmkúr ...	3	1	3	323	46
Mysore ...	6	...	3	395	44
Hassan ...	6	...	1	188	27
Shimoga ...	3	...	3	331	55
Kadur... ...	5	...	3	523	65
Chitaldroog ...	5	...	2	411	59
Total.....	42	8	25	3,390	45

pupils, against 67 last year with 3,000. The table in the margin shews the distribution. Of Kanarese schools, one at Chikmagalur was given up, as the town has extended so as to include two neighbouring villages which have large Hobli schools: hence it was resolved to concentrate the instruction in Chikmagalur itself in the English school. One additional Telugu branch was opened at Maddagiri in Túmkúr District, and 8 new Hindustani schools were established, of which 6 were branch schools for the local military force.

88. *Kanarese Schools.*—These are 42 in number, with an attendance of 2,177 boys and 59 girls, or 2,236 altogether, against 2,101 last year. The girls are most numerous at Sringeri, where there are 25, and at Nuggehalli, where there are 10. The schools at Honnavalli, Sorab, Tirthahalli and Huliyar have made a very great advance during the year, entirely the result of appointing competent and energetic masters to the charge of them. Two of these places, Sorab and Huliyar, have had schools for several years, but always in a low condition, and it was even represented that there was no field for a good school at either town. The effect of appointing suitable masters has dispelled, as if by magic, these unpromising views, and my own experience leads to me to be very sceptical as to the impossibility of getting up a school in any place however apparently unfavorable. Of other schools, those at Channapatna, Goribidnur, Turuvekere, Gundlupet, Talkad Narsipur, Sringeri, Chitaldroog and Kadur have advanced. On the other hand, the Shrinivaspur, Chintamani, Maddur and Malur Narsapur schools have fallen very low. The latter has since been converted into a Hobli school, as also the one at Kengeri. The Maddur master has been dismissed. Arrangements will be made in the others to restore them to a good condition.

89. *Telugu Schools.*—There are 8 of this class, with 265 pupils, the same as last year. They are chiefly situated in the Kolar District.

The Deputy Inspector reports that they are fairly conducted, and keep their places in both numbers and efficiency. Those at Kolar and Chikballapur are considerably in advance of the others. The remainder are mostly elementary, but sufficiently meet the requirements of the Telugu speaking population.

90. *Hindustani Schools.*—We have now 25 with 889 pupils, against 17 last year with 513. Of the present total, 11 are girls, 10 of whom are in the Sidlagatta school. The new schools, established principally for the benefit of the local force, are branches situated in the Barr Lines, Bangalore, Túmkúr, Chikmagalur, Chitaldoorg and Shimoga, in the Savar Lines, Bangalore, and at Hoskote and Malur Narsapur. The schools at Sidlagatta, Dodballapur, Shikarpur and Shimoga are specially well reported on. The Mulbagal, Tarikere and Kankanhalli schools are fair. The new branches have also made a promising commencement. The most unsatisfactory are the schools at Sira and Belur.

Statistical Information.

1,911	0—10—1	2,392	982	16	3,390

2. *Hubli Schools.*

91. The total number stands at 647, with 19,420 pupils, against 592 with 18,068 last year. A few new schools have been established in every District but Chitaldroog. The total average attendance at each school, taking all together, keeps up at a little over 30, which, consider-

ing how much distress has prevailed among the agricultural classes during the year, must be considered an encouraging result.

92. The statement in the margin shews the distribution of schools by Districts. The average has risen most in Kadur, and slightly in Mysore and Hassan. In the other Districts it has fallen a trifle. The rate is below the normal average only in Kolar and Hassan: in the former case this is probably due to the famine, in the latter it may be attributed in part to the neglect of the Sub-Deputy Inspector, since removed.

District.	Schools.	Pupils.	Average.
Bangalore ...	97	3,123	32·2
Kolar	103	2,549	24·7
Túmkur ..	73	2,263	31
Mysore... ...	111	3,357	30·2
Hassan	81	2,090	25·8
Shimoga ...	72	2,431	33·7
Kadur	51	1,605	31·4
Chitaldroog ...	59	2,002	33·9
	647	19,420	30

93. There are at the end of the year 19,093 boys and 327 girls under instruction in the Hobli schools, against 17,921 and 147, the corresponding figures for last year. According to creed, 18,521 are Hindus, 860 Muhammadans, and 39 others. The girls are most numerous at Melkote, where there are 43, and at Molur, where there are 13. In other schools the highest number in any one is 7, and in many only 2 or 3.

94. The largest schools are those at Melkote with 134 pupils, Vadagenhalli with 113, Tyamagondal with 102, and Ajjampur 101. The remarks on these schools made in last year's report continue to hold good.

95. Then follow Bellavi and Siralkoppa schools with 98 and 93 respectively, Belagutti with 87, Bagur 86, Bidadi 81, and Sulibele 80; after these there are 7 schools—Lakkur, Hebbaleguppe, Mattavara, Holalkere, Kubatur, Sindhugatta and Gogga, with an attendance of between 70 and 80; 18 schools with an attendance of between 60 and 70, and 34 schools whose attendance is between 50 and 60. More than 10 per cent of the Hobli schools thus have an attendance of from double to quadruple the normal average.

96. The progress and condition of the schools may be illustrated by the following statements. The Inspectors report 23 schools to be very good, 205 to be good, and 257 fair. These results shew that 76½ per cent

of the schools are in a satisfactory condition, and 35 per cent in a condition described as good or very good. Of the five classes or standards, again, which are prescribed for each school, there are 27 schools which have a first class as the highest, 240 whose highest class is a second, and 220 in which the highest class is a third. From this it appears that 267 or 41¼ per cent of the schools have pupils who have attained either the first or second standard of instruction laid down as the curriculum for Hobli schools.

97. In last year's report such schools were described as having advanced beyond the elementary stage, an expression which appears to have conveyed the impression that an effort was being made to force them up out of the sphere of elementary schools. Such is not the case. The remark had reference to the advancement of the pupils within the appointed limits of the course of study for Hobli schools, and special care has been taken to guard against the work of the schools being diverted from the end proposed in their establishment. No words in fact could more precisely define the position they occupy in the educational system of Mysore, and the character it is designed they should continue permanently to retain, than those employed in the Government of India despatch, No. 60 of the 14th March last, containing the comment above referred to, namely, "to keep in the elementary state for successive generations of children."

98. Further to elucidate this point, it may be stated that of the whole number of pupils there are only 92 in the first or highest class, and 1,372 in the second; while there are 3,567 in the third, 4,774 in the fourth, and 9,616 in the fifth or lowest. It will thus be evident that few remain at school long enough to go beyond the third class, and only an insignificant number until they arrive at the top. The majority are satisfied with having learned to read ordinary print or manuscript (with comprehension of the meaning), to write, do sums in the four simple rules, and distinguish the chief features on the Map of the World. This is not a high standard of attainment, but it is a grounding in the essentials of education. The instruction imparted aims at the useful, is well adapted to the circumstances of those who resort to these schools, and is much superior in quality to what was available before in the indigenous schools of the country.

99. The course commences in the fifth or lowest class with learn-

ing the letters, by reading them off cards hung on the wall, and by forming them in sand on the floor after the native method. In the fourth class the first reading book is gone through, containing words and short sentences, the pupils learn to write words on a slate, to form the numerical figures in both Kanarese and English, to read off numbers by tens, hundreds, thousands, &c., and add. The third class learn to read a story book, giving the meaning, to write simple phrases to dictation, go through orthography in grammar, commit to memory the multiplication tables of integers and fractions on the native method, do exercises in the four simple rules of arithmetic, and point out the principal features on the map of the World. The second class have a more advanced reading book and make a beginning with simple poetry, write to dictation on paper, read manuscript, learn the parts of speech and etymology, commit to memory and recite a portion of the Amara after the native method, but with general meanings, do sums in the four compound rules of arithmetic, and learn from the map the countries of the world with their chief cities. The first class wind up the course with a study of poetical selections and fairly difficult prose, including lessons on agricultural and sanitary subjects, learn to write petitions and letters and read such, go through syntax in grammar, proceed further in Amara, learn proportion, interest and fractions in arithmetic, with a little mensuration and keeping of accounts, and in geography learn about the natural features, products, population, &c., of different parts of the world, especially of India.

100. All the instruction is in the vernacular, mostly Kanarese, but in a few schools in Telugu, and in others in Hindustani. Promotion from one grade to another is made only by the Sub-Deputy Inspector, after examination of the school, generally twice a year. As regards the number who pass out of the schools in the course of the year, I have the statistics for the Second Circle only, from which it appears that, with a total of 7,511 pupils in the Hobli schools of that circle, 2,716 left and 3,330 were admitted in the year, 400 of the latter being the admission into new schools.

101. The school panchayats or local committees are stated to have begun in a few cases to shew themselves of service. The erection of school houses, which is expected of the people themselves, has been checked by the famine, but in spite of hard times a few have been completed. As regards furniture, which is allowed to those schools that are provided

with properly secured premises, some modification has been made in the design of the articles hitherto supplied. The blackboards have from the beginning been made to hang on the wall instead of requiring a separate easel or stand. A combined desk and bench has now been adopted, which allows of the flap for the desk being either lowered so as to form a back to the seat, or raised for writing. By these improvements not only is space economized, which is an important consideration, but the articles cost less than those formerly in use.

102. Of the books used in these and other Kanarese schools, several have been thoroughly revised by competent hands, as described under that head. The recasting of the Agricultural Class Book has been undertaken by Mr. Harman, Superintendent of the Experimental Farm, and will be issued as soon as ready in a new form.

103. There is no doubt whatever that these schools are doing important work, and have taken a thorough hold upon the people. Applications for the establishment of new ones are being constantly received, sometimes in the most imploring terms. But in some cases, though the desire for the school is perfectly genuine, the number of pupils procurable is less than 30, the minimum which has been adopted as one of the conditions preliminary to the establishment of a new school. In a few such cases it has been found advantageous to appoint a pupil teacher to open the school as a branch of the nearest Hobli school. In this way the wants of a village can be very economically met, and an extension of this arrangement will probably prove to be the best way of bringing under instruction the children of villages that do not yet, owing to distant situation or other reasons, take advantage of the Hobli schools.

E. Female Schools.

104. During the year two new schools have been established, namely at Hole Honnur in Shimoga District, and at Dodballapur in Bangalore District. On the other hand the Hassan School was made over to the care of the Wesleyan Mission with a grant-in-aid, thus leaving a total of 10 directly connected with Government. The particulars of attendance are given in the margin.

District.	Schools.	Pupils.
Bangalore ...	5	180
Kolar ...	3	125
Hassan ...	1	45
Shimoga. ...	1	41

105. Of the schools in the Bangalore District, those at Closepet and Dodballapur are entitled to commendation. At the former, the first girl has been made a pupil teacher. The master of the Bangalore school was overtaken by an extraordinary series of disasters in his family and he was obliged to resign. The school has made decided improvement under new management.

106. In the Kolar District, the schools at Sidlagatta, Shrinivaspur and Chikballapur are the best, and the Deputy Inspector reports that there has been a great improvement generally in the teaching. "The girls in the higher classes can read from the third book fluently, and write fairly to dictation passages from any book in easy style not learned by them at school. A little grammar and geography have also been taught. But the progress in arithmetic is not commensurate with the advancement of the girls in other subjects." The most advanced girl at Sidlagatta, a Brahmani, has been appointed as pupil teacher, much to the benefit of the attendance and satisfaction of the townspeople.

107. At Chikballapur a very decided testimony has been borne to the popular interest in these schools, which it gives me pleasure to bring

to the special notice of Government. A convenient and well built school house has been erected by private effort, and formally made over to the Educational Department for the use of the girls. The site on which it is erected was presented by Venkat Krishnappa, a resident of the place. The carrying out of the work was undertaken by Mr. Muddu Krishna Naidu, the Munsiff of Chikballapur, who for the purpose obtained from Mr. Krishnaiengar, the Deputy Commissioner of the District, permission to use some of the old fort stones, contributed the wood work himself at a cost of Rs. 130, and raised subscriptions in the place for the rest of the work to the extent of Rs. 109. The building is described as "a pucka one. The walls are of granite stones, the roof is composed of jungle wood couples, with teak rafters, and flat and pot tiles. The door and windows are also of teak wood." The plan of the building is a room 25 by 15, with a verandah on the entrance side.

108. The Hole Honnur school has started under favorable prospects, and arrangements have been entered into with a young widow, a resident of the place, who it is the desire of the people should be appointed as an assistant teacher.

109. Were it not for the unfortunate condition of the country, arising from the pressure of the famine, there is every indication that we might now succeed in considerably extending female education. Schools are applied for in more than one place. Nyamti, a populous Lingayat town, seems to present a suitable opening. There are also a good many girls attending at Yedehalli, Sringeri, Chamrajnagar and Pavagada. The girls' branch of the Melkote Hobli school has already been noticed, with the number of girls in other Hobli schools. Under the grant-in-aid schools, the further operations of female education will be detailed.

F. NORMAL SCHOOLS.

Hindustani Normal School, Bangalore.

110. This school has at the end of the year 13 students under instruction, of whom 10 are in receipt of stipends, and one first class student is attached to the Hindustani School, Mysore, as a practising master. At an examination held in February, 5 students gained one-third of the total number of marks. Of all the school subjects, arithmetic is reported to be the only one in which the students had not been taken thoroughly. This is owing chiefly to the want of knowledge of the advanced rules on the part of the Training Master, who in other respects is probably as well qualified for his work as any man we can get. The Hindustani edition of Barnard Smith's School Arithmetic has been introduced for the study of this and other Hindustani schools, which will no doubt effect an improvement.

Training Schools for Hobli Masters.

111. The three Divisional Normal Schools for training masters for Hobli Schools have been well occupied during the year. They have all suffered considerably from the effects of famine and epidemic diseases. The Nundydroog Normal School was located at Devanhalli throughout the year, but has since been moved to Kolar. The Ashtagram Normal School was part of the year at Nanjangúd, and then transferred to Hole Narsipur. The Nagar Normal School was first moved from Kadur to Chitaldroog, and finally to Shimoga.

112. *Nundydroog Normal School.*—This school sent up 21 candidates for the certificate examination, of whom all but one were successful. This result is very creditable to the Training Master, Applachari. All the passed students received appointments. The Deputy Inspector

reports himself as well satisfied with their abilities and attainments. The only defect observed was as regards knowledge of the theory of teaching and of method. This may be accounted for to some extent from the want of a text book on the subject in Kanarese. But during the year this want has been supplied, and a Manual of School Management in Kanarese compiled by Rama Bhadraiya, formerly Normal Master in Mysore and now in Coorg, has been printed and distributed to all vernacular masters and students in Normal Schools.

113. On the transfer of this school to Kolar at the end of the year, instead of taking any more outsiders as candidates for masterships, the most promising of the pupil teachers already in employ have been enrolled for further training. As these are mostly lads who have been educated in the Hobli schools and as they have already had some experience of teaching, they may be expected to turn out on the whole a more efficient body of schoolmasters than many of the old style now in the Department.

114. *Ashtagram Normal School.*—At the certificate examination held in November, 31 candidates passed the required test. Of this number 6 were re-appointed to old schools, the other 25 opened new schools in different parts of the Division. As great difficulty was experienced in getting masters for the Arkalgúd, Manjarabad, Hassan, Belur and Narsipur Taluks, the school was transferred into that neighbourhood, and stationed at Hole Narsipur, with the intention of admitting candidates from that quarter only. There were at the time 22 students, who followed the school from Nanjangúd. But no sooner was the transfer effected than an out-break of cholera carried off one man and scattered the rest. The school was closed for a time and is now filling again slowly, but 10 of the 22 enrolled students never returned. The Training Master, Venkat Rao worked very successfully and has now been put in charge of Hassan District as Sub-Deputy Inspector.

115. *Nagar Normal School.*—As the results of the year's work, 21 candidates have been trained and posted to schools, and 14 masters have been re-trained and sent back. The Inspector reports "the questions in grammar and arithmetic were more difficult and more numerous than those proposed at any previous examinations. They were answered in a style which shewed the most careful preparation and study on the

part of the students, and assiduous industry and pains on the part of the master. The results of the examination this year were better than those of any held before. The Training Master Venkatnarnaiya has done his work well and thoroughly and deserves high praise. He has worked in circumstances of peculiar difficulty this year. Cholera broke out with great violence in Kadur in April. Two of the students in the Training School died, and there was a general panic among the remainder, who all ran away to different places. It was found necessary to close the school for a month. The students returned at intervals, but the interruption to work was great.

116. There has been no lack of candidates for employment. About 100 applications were received during the year. It would be easy to keep the school up to 60 men."

G. Other Schools for Special Education.

School of Engineering and Natural Science.

117. This institution began the year with 8 students in the Upper Department and 6 in the Lower. In January 4 new students were admitted to the former, and 6 to the latter. Mr. Gramatzki, Executive Engineer, 3rd grade, conducted the school throughout the year as Principal, with Mr. Subba Rayar, B. A., B. C. E., as Assistant.

118. *Upper Department.*—The 8 second year students in this branch, on the completion of the first half of the prescribed course of study, were subjected to a general examination in all subjects, and out of a maximum of 840 marks, gained the totals given in the margin. Taking one third of the whole as the standard for a pass, with one quarter in each subject, five passed. Of the remainder, two were considered to have done nearly as well as they could, considering they had little talent for mathematical studies, in which a high standard had been fixed. No. 7 was believed to have failed through want of proper exertion.

Srinivas Rao, B. A.	483
Govindacharlu	418
Balakrishna Tivari	416
Raghavalu Naidu	344
Venkatachari	293
Abdul Karim	254
Lovery ...	229
Muttanna ...	217

119. At this stage of the course it became necessary to nominate the students to the special Departments for which they were to be trained, and on receiving the results of the examination, the Chief Commissioner decided that the first five should continue the course for the Public Works Department, and the other three be trained for the Forest Department. In future, however, students will be required, to signify on admission, the Department in which they would wish to be ultimately employed, and a selection of as many as may be wanted for each will be made from those who stand highest in the class.

120. For the special scientific instruction to be provided for these students during the remainder of their course, the following arrangements were made:—Mr. F. E. Harman, M. R. A. C., F. C. S., Superintendent of the Government Experimental Farm, to give a course of lectures on Geology and Meteorology; Mr. J. Cameron, Superintendent of the Lal-Bagh, to instruct the Forest students in elementary Botany, to be followed up by a course of lectures in Vegetable Physiology by Mr. Harman. Lectures in Chemistry were undertaken by Mr. W. P. Lynam, C. E., who at the close of the year was appointed to act as Principal during Mr. Gramatzki's absence on furlough.

121. The 4 first year students, in the first quarterly examination came out in the order given in the margin, the maximum number of marks obtainable being 240.

Ranga Rao ...	167
Sitaram Rao...	126
Prahlada Rao	98
Narayain Rao	84

122. *Lower Department.*—Of the 6 original students in this department, two were removed during the year for repeated failure in examinations and general inability to pursue the course of study. The other four carried the course to completion, and were examined by means of papers and practical exercises set by different gentlemen on the various mathematical and engineering subjects of the course. The results were as given in the margin, where the total number of marks gained by each student out of the maximum of 1,050 is shewn. The last one was not altogether satisfactory, but having gained over one third of the marks was allowed to pass.

Nalla Nayagam	702
Narasimha Aiyangar	605
Raghavachari	564
Phaure	431

123. Since the end of the year, the first and last have been appointed to the Irrigation Branch of the D. P. W., and the other two to the Roads and Buildings Branch.

124. The first year's students of this department stood as shewn in the annexed statement at their first quarterly examination, the maximum number of marks being 230. Only the first and third passed in all subjects.

Ramanujachari	178
Srinivas Rao	109
Kadirvelu	100
Raghunath Ayaingar	93
Armugam	82
Ananda Rao	46

125. It is proposed to open a second class, for the purpose of training lower subordinates for the D. P. W., when the necessary arrangements for instruction have been sanctioned.

126. The instruction of convicts in jail has been carried on as reported in former years. The figures in the margin shew the number under instruction at each station. Of those in Bangalore 12 are women and 33 juveniles. The number at Shimoga is not a half that of last year. The other figures are nearly the same.

Jail Schools.

Bangalore	444
Mysore	230
Shimoga	150

127. *Central Jail.*—The following extracts on education are taken from the report of Dr. McGann, Superintendent of the Central Jail.

"The following statement shews the school results. Matters on this head have gone on as usual. On the last day of the year there were—

1st Class or lowest	..	..	159
2nd ,,	..	..	97
3rd ,,	..	.	93
4th ,,	..	..	23
5th ,,	..	..	14
English	..	..	17
Women	..	..	8
Juveniles	..	..	18
		Total....	429

Average number under instruction 506. The progress is very slow, as a rule, the majority do not in fact know how to learn, and comparatively few of these latter ever get beyond the elementary stage. There are, however, a good many exceptions, notably those in the higher classes, and those learning English.

128. The school is however a good institution, notwithstanding the small results obtainable, as if they like it for their own sake, and try to learn, the moral effect may be presumed to be good ; and on the other hand, if they dislike it, compelling them to remain at it exercises a punitive and disciplining effect.

129. For women the paid female teacher has been in constant attendance during the year. As mentioned in last report, a few learnt to read a little, to write in sand, and repeat a few verses from the Padyasara.

130. The juveniles have been employed as before, upon the garden and in learning to read, write and count, &c., and in keeping themselves and their prison neat and clean."

VI. PRIVATE INSTITUTIONS UNDER GOVERNMENT INSPECTION.

131. The following is the statement in the prescribed form of the schools receiving grants in aid from Government :

Class of Schools.	Number of Institutions.	Number of Pupils on the Rolls, Monthly Average.	Average daily Attendance.	Grants-in-Aid given by Government.	Expenditure from all sources other than Grants-in-Aid given by Government.	Fees.
Boys' Schools—						
Higher	6	1,173	1,019	12,160	29,653	18,552
Middle	37	2,223	1,800	13,480	20,585	3,765
Lower	47	2,267	1,955	8,124	11,467	907
Girls' Schools—						
Higher	3	346	332	4,040	10,097	6,410
Middle	10	778	609	3,390	3,457	1,950
Lower	21	1,503	1,261	5,996	9,731	687
Normal Schools ...	...	...	...	...	...	...
Other schools for special education ...	2	147	147	3,000	2,596	...
Total.....	126	8,437	7,123	50,190	87,586	32,271

132. *New grants.*—The new monthly grants made during the year were the following :—

Boys' schools.—Wesleyan Kanarese School,	Hebbur	Rs.	10
Kalánidhi Sanskrit School,	Chamrajnagar	„	15
Vineya Bodhini	„ „	„	15
Sadvidya sále	„ Mysore	„	20
Sarasvati vilasa	„ „	„	20
Sanskrit School,	Chitaldroog	„	15
Do	Kolar		10
Do	Túmkúr		15
Hindustani school,	Rudrapatna		4
Do	Kadnur		10
Do	Budikote		7
Do	Kyalnur		7
Do	Sagar		7
Do	Benkipur		7
Girls' schools.—Wesleyan Kanarese girls' school,	Hassan	„	25

133. *Increased grants.*—The grants previously given to the following schools were augmented as stated below :—

Sanskrit school,	Chikballapur from	Rs.	15	to	Rs.	30
,,	Seringapatam	,,	20	,,	,,	25
,,	Muttur	,,	15	,,	,,	20
,,	Sravan Belgola	,,	15	,,	,,	20
,,	Melukote	,,	40	,,	,,	60
Hindustani school,	Davangere	,,	10	,,	,,	15
,,	Honnali	,,	10	,,	,,	15
Madrasa Sultani,	Bangalore	,,	20	,,	,,	30
Saint Mark's Infant school,	Bangalore	,,	5	,,	,,	25
Wesleyan Kanarese Girls' School,	Sivarampet	10	,,		,,	20

134. *Building grants.*—Lump sums were granted in aid of the erection of school premises, under the rules provided for that purpose, as follows :—

Wesleyan Kanarese Boys' school, Main street,	Bangalore,	Rs. 800
Sanskrit School,	Chikballapur	,, 800
Wesleyan Mission School,	Kallur	,, 130
London Mission School,	Anekal	,, 115

135. *Grants withdrawn.*—On account of irregularities and disregard of warnings given, it became necessary to suspend and withdraw the following grants :—

Hindustani school,	Channapatna ..	Rs. 20
Sanskrit school,	Kadaba	,, 15
Sarasvati Vilasa,	Mysore	,, 20
Sanskrit School,	Molur	,, 10

136. A general review of the present distribution of educational grants-in-aid, arranged according to religious denominations, gives the following results :—

Denomination of School.	Annual amount of Government grants.	Annual receipts from other sources.	Total number of pupils.	Average annual cost of educating each pupil.						
				Total Cost.			Cost to Government.			Percentage borne by Government.
Church of England..	10,140	15,483	581	44	1	7	17	7	2	39·5
Do Scotland ...	2,760	4,981	176	43	15	9	15	10	10	35·6
Wesleyan Mission...	10,980	15,374	3,377	7	12	9	3	4	0	41·7
London Mission ...	4,500	15,468	1,131	17	10	4	3	15	7	22·5
Roman Catholic ...	5,520	13,060	938	19	12	11	5	14	1	29·6
Hindu	5,388	7,704	973	13	7	3	5	8	7	41·1
Muhammadan ...	5,754	5,830	1,108	10	7	3	5	3	1	49·6
General... ...	1,080	2,292	159	21	3	4	6	12	8	32·0

It will be seen that next to the schools under Muhammadan management, Government bears the largest share of the expenditure in Wesleyan schools, there being also but a trifling difference in this respect between them and the Hindu schools.

137. Arranging the Aided Schools according to the language which forms the subject or medium of instruction, the following are the results :—

Language.	Boys.'—		Girls.'—	
	Schools.	Pupils.	Schools.	Pupils.
English	7	454	6	352
Anglo-Vernacular ...	14	1,736	3	271
Kanarese	17	1,505	17	1,656
Telugu and Tamil ...	7	560	6	404
Sanskrit	18	708	...	...
Hindustani	27	1,083	2	140

138. The distribution of Aided Schools in each District is as under :—

District.	Boys'—		Girls'—	
	Schools.	Pupils.	Schools.	Pupils.
Bangalore	44	3,439	22	1,825
Kolar	9	333	...	...

Mysore	12	835	5	392
Hassan	4	210	2	97
Shimoga	6	269	1	105
Kadur	...	...	...	...
Chitaldroog	2	73	1	42

A. Aided Schools of the Higher Class.

139. *English.*—The total number of students in Bishop Cotton's stands at 128 against 138 last year. The fees yielded Rs. 6,273 against Rs. 5,940. The institution continued under the charge of the Rev. Dr. Pope as Warden, assisted by 6 masters and a Kanarese

Bishop Cotton's College and School.

munshi. The number of boarders was 35 at the school, and 10 private boarders residing with two of the masters. At the University examinations one student obtained the degree of B. A., two passed the F. A. examination, and 13 matriculated. The inspection took place in November, when the college classes were examined in Latin by Mr. Bhabha, who states that "on the whole both the F. A. classes, but especially the senior, acquitted themselves very creditably." The report on the examination of the school classes was favorable as regards the upper section of each form, and the institution may be described generally as maintaining a good standard of efficiency and discipline.

Saint Andrew's School.

140. At the end of the year there were 109 pupils, against 95 at the time of last report. On the other hand the fees are stated to have produced Rs. 4,373 against Rs. 4,699. Of the candidates from this school, 5 succeeded in matriculating. Mr. Thomson had charge of the school throughout the year as Head Master, and the staff of subordinate masters remained the same as before. The results of inspection shewed that the institution was making fair progress, and that the classes were in good order.

Wesleyan Institution.

141. *Anglo Vernacular.*—The year ended with 377 pupils against 353 last year. The sum obtained from fees was Rs. 2,991 against Rs. 2,851. The school was conducted by the Rev. Mr. Vanes, B. A., who came out from England to take charge of it. At the matriculation examination 22 candidates from this school passed. The various classes were examined at the time of inspection, and the fifth seems entitled to special commendation. But, with a few defects here and there, the institution as a whole continues to maintain its long standing character for efficiency.

London Mission Institution.

142. The number of pupils increased during the year from 274 to 305, and the amount realized from fees was Rs. 2,751 against Rs. 2,057. The Rev. Mr. Walton had charge throughout the year. One of the masters, a native Christian, who has received all his education in this institution, took the degree of B. A. In the matriculation examination 16 students passed. From the notes of inspection, it appears that the fifth class was somewhat too large for instruction by one master. Of the others, the third and second did very well. The general results of the examination were favorable.

Mr. Walton continued his course of public lectures on physical science, which were attended by large audiences of native gentlemen and youth.

Wesleyan School, Mysore.

143. The strength of this school was nearly the same as last year, or 183 against 179. Fees yielded Rs. 1,536 against Rs. 1,488. For part of the year the Rev. Mr. Haigh had charge, and was succeeded by the Rev. Mr. Hocken. The number of students who matriculated was 7. A change of the school hours from the morning to the middle of the day was adopted simultaneously with the alteration of hours in the Raja's High School. The attendance has varied very little from year to year for some time past, and the school maintains a steady and good position.

Saint Joseph's Seminary.

144. The numbers in this school have fallen, according to the returns, from 229 to 142, but in connection with the great disproportion which the daily attendance previously bore to the whole, as pointed out in last year's report, it is probable that the roll has now been made up with greater care. At the matriculation examination three students passed, one of them, placed 25th in the first class, taking the lead of all those who matriculated from Mysore. At the inspection of the school, the mathematical subjects seemed to be on the whole better studied than the language lessons. Deficiencies in English are noted more or less in every class.

Statistical Information.

B. Aided Schools of the Middle Class.

145. *English.*—A slight reduction of numbers has taken place in both the schools coming under this head, namely, Saint John's and the Ordnance Schools, as regards the former, the inspection report shews that several improvements were needed both in the classification of the boys and in the selection of properly graduated lesson books. There seems to have been an effort to aim at a higher standard than was warranted by the attainments of the boys. In evidence of this, it is sufficient to state that though the school contained only 3 classes, the lowest was learning reading and spelling, the highest was going through the matriculation text book. The standard of the Ordnance School is very elementary, and owing to the continual changes among the pupils, arising from the transfers of their parents, it is difficult to exhibit any decided advance from year to year.

146. *Anglo-Vernacular.*—Of the five schools here included, four are in Bangalore, two belonging to the London Mission and two Roman Catholic. The fifth is the Jaghirdar's School at Yelandur. All but the London Mission Cantonment School have lost ground considerably as regards numbers. The report on this school is very favorable, and the care that had been paid to ensure a good pronunciation of English is specially noted. In this as well as other respects the Alsur School was much inferior. Saint Patrick's Seminary is attended by boys in very poor circumstances, and the character of the institution is reported to be quite elementary. Saint Mary's Seminary is intended for the training of young men for mission work. They principally learn Kanarese, with some Latin and English. The Yelandur School reached such a poor condition that the Jaghirdar has resolved to give up the English school and confine instruction to Kanarese, which is much more in demand and promises better results.

147. *Kanarese.*—The two London Mission Schools, at Anekal and Malur, are reported to have worked satisfactorily during the past year, but that they would work to better purpose if their aims were confined to narrower limits. Of the three Wesleyan Schools, those in Túmkúr Fort and Mysore Market Street are described in favorable terms. The

one in Bangalore Main Street stood low at the time of inspection, but has since revived.

148 *Tamil and Telugu.*—The Chatur Veda Siddhanta Sabha Seminaries, which had declined in efficiency from lax discipline and insubordination among the teachers, have resumed their former position, and are now as well managed as could be desired.

149. *Sanskrit.*—The character of the instruction in these schools has been described in previous reports. Endeavours to extend the course, so as to embrace the usual elements of secular instruction taught in other schools, have been partially successful. But, notwithstanding the improvements that have been made on the old unsystematic mode of conducting these schools, the scheme of instruction in many of them is still tediously diffuse.

150. At Melkote, arithmetic as far as vulgar fractions and proportion is well taught, and the elements of algebra according to the Bija Ganita are understood. The Sadvidyasale at Mysore deserves credit for its activity in the same direction. The schools at Chikballapur and Muttur are much ahead of the others in the Nundydroog Division, and are making excellent progress. The discipline and teaching in the Bangalore school are stated to have greatly improved. The pandits in charge of the Magadi and Chintamani schools, I regret to state, fell victims to cholera. Suitable arrangements have been made for supplying their places. Of the remaining schools, those at Sravanbelgola, Chamrajnagar and Chitaldroog are fairly reported on. Improvements have also been effected at Túmkúr and Kolar. The remainder are not satisfactory.

151. *Persian and Hindustani.*—The four large Madrasas in Bangalore are reported to have a steady attendance, and to have improved in the standard of their instruction. All are described by the Deputy Inspector as in an excellent state of order and discipline. It is gratifying to note that, in the Address to the Queen voted by the Muhammadans of Bangalore on the occasion of Her Majesty's assuming the Imperial title, they refer in a very special manner to the benefits they have received from the promotion of education.

C. AIDED SCHOOLS OF THE LOWER CLASS.

152. *English.*—The Cantonment orphanage contains 21 boys and 24 girls. An attempt had been made to work the school with only one master, the grown girls attending only in the morning, and then learning needlework with the matron in the afternoon, when the boys and little girls were taught by the master. The want of a mistress to teach the grown girls separately from the boys was quite evident. As the Government grant had been increased for the purpose of providing an assistant teacher, this state of things was brought to the notice of the Committee, and a mistress has since been appointed. All the work indoors is done by the inmates, the only servants kept being a sweeper and a gardener. Similarly, at Saint Mark's Infant School another hand was clearly required, there being only one mistress, whose duties included both the instruction of all the children and the preparation of their dinner, in which operation much of her time naturally went. Saint Andrew's Poor School contains 34 boys and 33 girls of the poorest classes of Eurasians resident in Mutucheri and its vicinity. The school is energetically conducted and supplies a great want.

153. *Anglo Vernacular.*—The Blackpalli Catholic Schools and the Wesleyan School, Broadway, are reported to have made a considerable advance both in numbers and efficiency, the result of appointing better teachers and reorganizing the schools. The Wesleyan Orphanage at Túmkúr is also well reported on. The Saint Paul's School has retrograded, owing to a change of masters, and the Mysore Catholic School is in a very elementary condition.

154. *Kanarese.*—Of the various schools here included, the Wesleyan Schools at Shimoga, Mandyapet, Túmkúr, Gubbi and Kadaba are in a condition of creditable progress, the two first having made a considerable advance. Improvements have also been instituted at several of the others, as at Hebbur and Kallur. Taken altogether, these schools are doing useful work.

155. *Tamil.*—No special remarks are called for by any of these schools. They may all be reported as working fairly and steadily among the classes for whom they are intended, principally the children of domestic servants. horsekeepers, &c.

156. *Hindustani.*—The poorer classes of Muhammadans have been greatly affected by the famine, and the attendance at many of these schools has in consequence fluctuated to such a degree as to obviate any regular progress. Of the schools in the west, which has suffered less, those at Davangere, Honnali and Benkipur are the most favorably reported on.

157. At Seringapatam an important measure has been introduced in establishing a branch of the Gumbaz Madrasa at the populous suburb of Ganjam. The Gumbaz Madrasa, or school connected with the mausoleum of Haidar and Tippu, is under the control of the Civil Pension Paymaster at Mysore, the cost of maintenance being defrayed from a source known as Tippu's Fund. It was held in the great mosque at Seringapatam, where two masters had the instruction of 6 or 8 little boys, who attended only in the afternoon, their study being almost confined to the reading of the Koran. One master has now been transferred to Ganjam, and 30 boys have already joined the school.

Number of Institutions.	Average Number of Pupils.	Cost charged to—		Total.	Annual cost of educating each Pupil.	
		Provincial Funds.	Other sources.		Average Total.	Cost to Government.

Fees.		Pupils.			
Total amount realized.	Average per Pupil.	Hindus.	Muhammadans.	Others.	Total.
907	0—6—5	1,556	724	264	3,544

D. Aided Female Schools.

158. *Higher Class.*—Bishop Cotton's School has an attendance of 81 girls against 75 last year. At the time of inspection there were 19 boarders. Four of the senior girls constitute the college class, and are instructed by Dr. Pope in the Boys' School, where, in addition to a course of English and mathematics, they learn a little Latin. The school classes passed a fair examination in the lessons taken up. In the Wesleyan School, the number of girls remains nearly the same as last year, or 62 against 67. The inspection report states that the school is on the whole in good order and the teachers well suited to their work. In the Convent there are 200 girls against 220 last year, of whom 95 are in the Tamil branch. The English department is divided into an upper class school, and a lower class or orphan school. The course of study in the first and second classes is the same for both. The results of the annual inspection were generally favorable to the character of the instruction imparted.

Bishop Cotton's School.
Wesleyan School.
Convent of the Good Shepherd.

159. *Middle Class.*—Of Saint John's Schools, the Girl's School is reported to be in a satisfactory condition. The Infant School was full of life and cheerfulness and well taught. The midday meal, given in these schools to the poor, is partaken of by 38 children. The lady who conducted Miss Fergusson's School retired from educational work on getting married. The school has, however, been re-opened by another lady, who has also since been married, but still carries it on. The inspection took place before the change, and the school was reported to be doing useful work as a mixed institution for girls and small boys in a populous neighbourhood.

160. Among the Kanarese Schools, the Wesleyan School at Shimoga seems to have made the greatest advance during the year. It was feared that the departure of the Missionary's wife to England would have seriously affected its progress, but under the active exertions of the catechist and his wife the school has been well maintained. The Siddikatte School is also stated to have made considerable improvement. The Túmkúr Fort School has been reduced by the outbreak of cholera. The Hindu School, Chitaldroog, taught by a Lingayet mistress, is in a creditable condition.

161. Tamil interests are well represented in the excellent Hindu Female School and the Alsur Caste Girls' School of the Wesleyan Mission. The former is a flourishing institution, and has continued to make steady progress during the year. The managers take great interest in its working and it has met with a large measure of success. The latter school is also very popular and well conducted. The Telugu Girls' School of the 36th Regiment M. N. I. has continued to make very satisfactory progress. The Subedar Major, Appavu Modaliar, who was its founder, takes great and deserved pride in its popularity. The anniversary of the school was held on Her Majesty's birthday, when a number of officers and ladies assembled to do honor to the occasion. Several of the girls were then publicly examined and acquitted themselves very creditably. It is deserving of note that the success of this school has led to a similar movement in another regiment, and that the Queen's Own Sappers and Miners have now established a Tamil Girls' School. A small grant has recently been given to it.

162. *Lower Class.*—Saint Bartholomew's school at Mysore retrogra-

ded during the year, owing it would appear to negligent control. Latterly it appears to have been restored to a better condition. The two Boarding Schools, one for Kanarese girls under the London Mission, and the other for Tamil girls under the Wesleyan Mission, are exceedingly well reported on, especially the former, which has long held a high position as a training school for native Christian girls. In the other also, the attainments of the girls are stated to be superior to those of the girls in any other of the schools of the Mission. This is owing to their remaining under instruction to a more advanced age, whereas Hindu girls in the day schools are withdrawn on reaching 11 or 12 years.

163. The purely Kanarese Schools consist of 4 under the London Mission, 7 under the Wesleyan Mission, one Roman Catholic, and one Hindu. There has been a good increase of attendance at the Srirampet school, Mysore, and at Gubbi. All the Mission schools are most favorably reported on, and there is no question that a very great and important work is being accomplished in them, under the immediate superintendence of the European ladies who daily visit them. On the other hand, not much can be said in praise of the Tamil schools placed in this class. Of the two Hindustani schools, the Muhammadan Sub-Deputy Inspector makes a report more or less favorable. The seclusion and secrecy which it is considered indispensable should be preserved with regard to these schools, prevents the formation of a very clear opinion as to their efficiency. The girls at any rate learn to read, and do simple sums, as well as a certain amount of needlework.

E. Aided Schools for Special Education.

164. There were at the end of the year 44 boys connected with this Association, apprenticed to different trades, with 29 boys and 30 girls under school instruction.

Anglo-Indian-Aid Association.

165. The following are the particulars of the trades to which the boys are apprenticed :—

Twelve as printers, 2 as shoemakers, 1 as a farrier, 5 as carpenters, 1 as an iron smith, 18 as mechanics, 4 as domestics, and one as a shop clerk. Their ages are from 13 to 20, but the majority are 15, 16 or 17 years' old.

Of the apprentices, 3 deserted, and the indentures were cancelled of 5 others, two of whom were admitted to Bishop Cotton's School, and the other three enlisted, one as bugler in the Royal Horse Artillery, the second in Her Majesty's 45th Regiment (Sherwood Foresters), and the third in Her Majesty's 16th Lancers, gone to England.

166. The boys and girls taught in school are stated to be making excellent progress in reading, writing, arithmetic and sewing.

167. The income of the Association for the year was Rs. 4,948, of which Rs. 2,400 was obtained from Government, Rs. 1,508 from subscriptions and donations, and Rs. 1,040 from other sources. The expenditure for the year was Rs. 4,355.

F. Private Unaided Schools.

168. The famine and sickness which prevailed during the year have so deranged matters generally, that it was not possible to obtain,

as was intended, more reliable statistics than hitherto with regard to the number of private unaided schools. A considerable diminution, however, as might be expected, has taken place in the total of both schools and pupils. According to the returns, there were at the end of the year only 935 schools with 13,165 pupils, against 1,350 last year with 17,882. The decrease is doubtless a direct effect of the famine.

169. The distribution of the schools in each District is given in the accompanying statement. The decrease is general in every District, but more particularly marked in Chitaldroog.

District.	Schools.	Pupils.	Average.
Bangalore	222	3,796	17·1
Kolar	91	1,303	14·3
Túmkúr	176	2,091	11·8
Mysore	133	1,790	13·4
Hassan	90	902	10.
Shimoga	51	809	15·8
Kadur	96	1,082	11·2
Chitaldroog	76	1,392	18·3
Total.....	935	13,165	14·

170. The Government of India, in reviewing last year's Report, have requested that detailed information may be given regarding these schools. As former reports have treated at length on the subject, I cannot do better here than give the following extracts from an anonymous article published in the Madras Journal of Education for July 1877, headed "A short sketch of the state of education among the natives of Bangalore," written in 1824.

"It is generally believed that the state of education in the Provinces is much inferior to that which at present obtains at the Presidency of Fort St. George. This is confirmed to a certain extent by the information I have been enabled to obtain on the subject, during a residence of some months at Bangalore, and by my own observation of the comparatively low degree of knowledge attained by the generality of the natives, and of the defective mode of instruction which prevails in the schools in this city, one of the richest and most populous in the country of Mysore.

In this country, education is confined to a very small portion of the people who are considered as the higher class, and except in a few instances, it never reaches beyond instruction in reading and

writing, and the simple rules of arithmetic; and even the few who may be desirous of extending their knowledge farther, necessarily labour under great difficulties from want of competent teachers, suitable books of instruction and a systematic method of education. The lower orders, the class of labourers, &c., who form the greater part of the population, are lamentably sunk in ignorance, without a single gleam of knowledge to enlighten their minds.

The richer class of merchants, artificers and shopkeepers usually possess some knowledge in the rudiments of learning, by means of which they are capable of keeping their own accounts and transacting their own business, while the poorer classes remain totally unacquainted with letters. Among the Brahmans, the Laukikas or the laity, who fill almost the whole of the civil offices in this country, are well versed in reading letters on business and in the mode of keeping accounts in one, and frequently, in two of the vernacular languages; and most of the Vaidikas or the clergy, unite to a knowledge of reading and writing, the ability of reciting a part of their Vedas, a qualification which is considered indispensably necessary to maintain their sacerdotal dignity; but their learning seldom extends so far as to enable them to understand the import of their scriptures, for it is but one in fifty that possesses a competent knowledge of the Sanskrit language.

In the town, fort and cantonment of Bangalore there are 7 Telugu, 21 Kanarese, 4 Mahratta and 3 Tamil, in all 35 Hindu Schools, which contain, in the aggregate, 560 scholars. Of these, 100 scholars are studying Telugu, 300 Kanarese, 100 Mahratta, and 60 Tamil. These scholars are composed of all sects indiscriminately. The number of learners compared with the estimated number of boys in this city would give a proportion of 1 to 5 or 6; but even of these scarcely one-fourth continue in school for a sufficient length of time to acquire a competent knowledge of reading and writing, the poorer class of people being frequently obliged to take their children from school and put them to some labor or employment before they have learned the first principles of education.

There does not exist in Bangalore any regular academy for Sanskrit, but this deficiency is in some measure supplied by a few of the learned Brahmans, who employ their leisure hours in gratuitously instructing a few young Brahmacharis who are willing to attend them at their convenience, in the Vedas (theology), Kavyas (poems), Sastras (sciences) &c.

The masters of the Telugu, Kanarese and Mahratta schools are commonly Brahmans, and, generally speaking, their knowledge in the languages which they respectively teach is as limited as that of other ordinary scholars in this country; they can indeed read a book with the greatest fluency and write a very legible hand, but

they are unable to explain the meaning of any passage in the books from which they instruct their scholars. There are however exceptions. Although the fifth year of the age of a boy is considered as the fittest period for him to commence his scholastic life, yet there are numerous instances in this country of boys being placed in school, some after the completion of their sixth year, while others do not enter it before they are ten or eleven years old.

On the first entrance of a boy in school, it is customary for him to make a present of a few fanams to the master and to worship the god of wisdom, whose image is set up in some schools, invoking him to grant him knowledge, and to enable him to surmount every obstacle that may present itself in the course of his studies; the master, or the town priest, assisting him in the performance of the usual ceremonies. The scholar then receives from the master a book containing the alphabet, written in large characters, and is taught to repeat the several letters three times over, as they are pointed out to him in the book. This done, a distribution of the offerings made to Ganesa takes place among the boys, and the newly admitted scholar, having duly saluted the image and the master, returns home. On this, as well as on every occasion when a scholar commences a new book or enters upon a new course of study, the whole school generally has a holiday during the afternoon, on which account, the scholar at whose instance this indulgence is granted, is obliged to make an additional present to those present. If the parent be rich, this initiatory ceremony is often performed with great pomp in the house of the scholar to be admitted, where the master and all his pupils attend for the purpose; and, in this case, a very handsome present is made to the master in money, clothes, &c., according to the ability of the donor, and the ceremony is generally concluded by a procession, the child being carried in a palankeen or on horseback, with music and dancing, through the town.

The emolument of a schoolmaster in this country is indeed very inconsiderable: the average monthly sum paid for each of the poorer children is a Cantaray fanam, equal to 3¾ Madras fanams, and even this, the schoolmasters complain, is not paid to them regularly; the richer boys pay from two to four Cantaray fanams, and sometimes more according to the circumstances of their parents. In addition to this, in some schools, each boy supplies the master with a small quantity of oil, firewood, betel nut, &c., once in a week or fortnight; and, in Navaratri, which occurs in the months of September and October, the schoolmaster assembles all his scholars, and conducts them to their parents and relations respectively, as well as to some respectable persons in the city, and causing the boys to sing hymns, &c., in their presence, obtains small presents in money, clothes, &c.

The school hours are from 6 o'clock in the morning to 6 or 7 in the

evening, in which time the boys are allowed two or three hours in the morning and at noon, for taking their meals, and at night they study their lessons at home. The full moon and the new moon and the first day of the bright and dark fortnights respectively, are allowed as holidays; all study being prohibited on those days, as also on various other festival days in the year.

The youngest scholars first learn the alphabet by tracing with their fingers each letter, which the master or the monitor, for as such the head boy acts in all the native schools, sets down on sand before them, and by repeating it aloud until they are able to write it down themselves without the help of a copy. They are then taught the connected forms of vowels and consonants, the numerals and the multiplication table, by writing them likewise on sand from a copy placed before them, and by reading them distinctly. This exercise forms a part of every day's labor, and is repeated for several months, sometimes by each boy separately and sometimes by all the boys promiscously, one leading and the rest following him. They also sometimes verbally repeat the name of the cycle years, the months, the days of the week, the planets, the signs of the zodiac, the constellations, &c. &c., and those who have had sufficient practice in deciphering the characters, are made to write down a few proper names, which the master or the monitors gives out to each boy individually; and when they are able to do this correctly, they begin to read over and commit to memory some books, receiving every day a fresh lesson of a moderate length but without having a single word explained to them. The scholars then proceed to work in various rules of arithmetic, which the master gives them written on a piece of cadjan leaf or on a painted board, and to exercise writing on cadjan leaves, boards, and paper, from the form set by the master in the upper line of the copy, first forming large characters and gradually reducing them to a moderate size. In reading, the children are taught individually, without method, order or discipline; there being neither classes nor promotion nor degradation in the native schools to excite a spirit of emulation among the students. Under all these disadvantages, when a boy continues in school and passes through the foregoing series of study, which generally takes him at least 5 years, he acquires a proficiency in reading any books or letters with fluency, in writing a good hand, and in the principal rules of arithmetic, and he is then considered as having had a good though not a liberal education; and sent out into the world to seek for a livelihood."

171. The above description still applies in all essential respects to the private indigenous schools throughout the country, though the spread of a better system of education by means of our Taluk and Hobli schools has not been without some influence in promoting improvement among such schools as are under enlightened management. But this effect is

very confined and not such as to alter the general character of the schools of the country.

VII. BOOK DEPARTMENT.

Stock.

172. The stock of books in the Central and Branch Depôts on the 31st March 1877 was of the value of Rs. 60,152. There were added during the year to the Central Depôt 57,796 books, at a cost of Rs. 15,091. The number of books supplied to Branch Depôts for sale was 36,383, valued at Rs. 8,456.

Sales.

173. The amount realized by sales of books and paid into Government treasuries was Rs. 16,696, or Rs. 2,112 less than last year. The decrease is to be attributed to the straitened means of the people owing to the famine, which checked purchases to the extent of former years.

174. The following books were printed for the Department :—

	Copies.
Bhuvivarane, Geography in Kanarese ..	5,000
Hindustani Arithmetical Cards	2,000
Urdu Grammar	1,000
Hindustani First Book	1,000
Karim ul Loghat	500
History of India in Hindustani	500

The second part of Mr. Stapley's Graduated Translation Exercises, Kanarese and English, was completed and introduced into the Anglo-Vernacular schools. A Manual of School Management in Kanarese was prepared by Training Master Rama Bhadraiya, and has been supplied to vernacular masters.

175. The following books were purchased for the Department :—

Kanarese.	...	Jaimini Bharata ...	... 700 Copies.
		Pancha Tantra ...	... 300 ,,
		Katha Sangraha ...	... 50 ,,
		Morris' History of India	... 400 ,,
Telugu.	...	First Book ...	... 1,500 ,,
		Second Book ...	... 400 ,,
		Third Book ...	... 100 ,,
		Geography ..	... 420 ,,
		Morris' History of India	... 50 ,,
		Nala Charitra ...	... 100 ,,
Hindustani.	...	First Book ...	... 200 ,,
		Second Book ...	... 200 ,,

VIII. LITERATURE.

176. The following is a summary taken from the separate report submitted on works published and registered in Mysore in 1876. The total number of publications was 68, against 38 the previous year and 56 the year before. The figures are given for the three years :—

Subject.	1874.	1875.	1876.
Biography	1	...	1
Drama	7	7	12
Fiction	5	4	13
History	1	...	...
Language	2	2	8
Law	9	3	1
Medicine	1	...	1
Miscellaneous	1	2	2
Poetry	6	3	5
Politics	1	...	.
Philosophy	4	1	9
Religion	15	12	11
Science, Mathematical	1	1	..
„ Natural	2	2	3
Travels and Voyages	...	...	2
Total.....	56	38	68

177. One book only was published in English, 55 were in the vernacular languages spoken in the country, 3 in Indian classical languages, 9 in more than one language. Of the works in the vernaculars, 40 were in Kanarese, 4 in Telugu, 2 in Tamil, 5 in Hindustani and 4 in Urdu. The classical languages were represented by one work in Sanskrit and 2 in Persian. Of the diglotts, 5 works were Sanskrit and Kanarese, 1 Sanskrit and Telugu, 2 Persian and Hindustani, 1 Persian and Urdu.

178. The chief ancient manuscript work I have procured during the year is an imperfect copy of Pampa Bharata. This author, whose period is fixed by another work I have, in 902 A. D., seems to have been to a great extent the father of Kannada literature, and I regret that in the manuscript now referred to the portion from which the particulars regarding him might have been derived is missing.

IX. School Buildings.

179. The Central College premises were enlarged and greatly improved by the Public Works Department, at a cost of Rs. 20,908, the extension being rendered necessary in order to accommodate the School of Engineering and Natural Science. The works are not yet finished, though completed sufficiently to allow of the whole of the premises being occupied by the Educational Department. The building, which is on a conspicuous site, bids fair to be an ornament to Bangalore. The High School premises at Shimoga were also enlarged by the Public Works Department, at a cost of Rs. 5,439; and the school is now commodiously housed.

180. Taluk school houses of the second class design were commenced by the Public Works Department at Kortagiri and Gundlupet. Four, stopped in the previous year by the outbreak of cholera, were completed by the Educational Department, namely at Gudibanda, Goribidnur, Sidlaghatta and Kankanhalli, and a commencement was made at Talkad Narsipur and Bowringpet. Premises were purchased at Channagiri.

181. Repairs were executed to 50 school houses, at a cost of Rs. 4,557, the estimates varying from Rs. 15 to Rs. 726. The school compounds at Chikmagalur, Hole Honnur, Maddur and Sidlaghatta were enclosed, at a cost of Rs. 1,265.

Conclusion.

182. I would beg permission in conclusion to express the thanks of the Department to the Chief Commissioner for the many tokens of his interest in educational work and support of measures for its extension. Also to the Officers of the Mysore Commission for their cordial assistance in the various parts of the Province under their respective jurisdiction.

183. My sincere acknowledgments are tendered to the inspecting and instructing officers of this Department for their willing co-operation and aid in the work of the year, the results of which have been detailed in the foregoing pages.

I have the honour to be,
Sir,
Your most obedient Servant,
L. RICE,
Director of Public Instruction.
